New Formulas for America's Workforce ,2003 **The American** ,1890 *New Formulas for America's Workforce*
National Science Foundation (NSF),2003 This book collects together approximately 200 descriptions and summaries of a wide range of projects carried out over nearly 10 years of NSF funded Gender Diversity in STEM Education programs that were set up to address the problems of women and girls in science and technology A good source of ideas See also the website **The Molecular Vision of Life** Lily E. Kay,1993 This fascinating study examines the rise of American molecular biology to disciplinary dominance focusing on the period between 1930 and the elucidation of DNA structure in the mid 1950s Research undertaken during this period with its focus on genetic structure and function endowed scientists with then unprecedented power over life By viewing the new biology as both a scientific and cultural enterprise Lily E Kay shows that the growth of molecular biology was a result of systematic efforts by key scientists and their sponsors to direct the development of biological research toward a shared vision of science and society She analyzes the motivations and mechanisms empowering this vision by focusing on two key institutions Caltech and its sponsor the Rockefeller Foundation Her study explores a number of vital sometimes controversial topics among them the role of private power centers in shaping scientific agenda and the political dimensions of pure research It also advances a sobering argument the cognitive and social groundwork for genetic engineering and human genome projects was laid by the American architects of molecular biology during these early decades of the project This book will be of interest to molecular biologists historians sociologists and the general reader alike Congressional Record United States. Kirk, Stuart J. Knechtle, Christian P. Larsen, Joren C. Madsen, Thomas C. Pearson, Steven A. Webber, 2014-07-21 Brought to you by the world's leading transplant clinicians Textbook of Organ Transplantation provides a complete and comprehensive overview of modern transplantation in all its complexity from basic science to gold standard surgical techniques to post-operative care and from likely outcomes to considerations for transplant program administration, bioethics and health policy. Beautifully produced in full color throughout and with over 600 high quality illustrations it successfully provides a solid overview of what transplant clinicians surgeons do and with topics presented in an order that a clinician will encounter them. Presents a holistic look at transplantation foregrounding the interrelationships between transplant team members and non-surgical clinicians in the subspecialties relevant to pre and post-operative patient care such as gastroenterology, nephrology and cardiology. Offers a focused look at pediatric transplantation and identifies the ways in which it significantly differs from transplantation in adults. Includes coverage of essential non-clinical topics such as transplant program management and administration, research design and data collection, transplant policy and bioethical issues. Textbook of Organ Transplantation is the market-leading and definitive transplantation reference work and essential reading for all transplant surgeons, transplant clinicians, program administrators, basic and clinical investigators and any other members of the transplantation team responsible for the clinical management or scientific study of transplant patients
