## Adaptive Test Overview

You can always switch on the Master-101 Feature now. You will encounter the welcome dialog box once at the Digital 800. Depending on your preference to the first reading of each section, you will have a more difficult or less difficult second reading of each section. It is kind of a diagnostic and potential problem indicator. There are ten configuration operations. In any of the sections (e.g., Power, Bit Reading and Writing, Memory, etc., for example), you can scroll up/back and/or reading and Writing sections of the same page you are reading. (The address of the last is written in the status bar.) You can also use a combination of scroll up/back and scroll left/right.
