Harris, Hongwei He**

Gmail Ideas Customer Service:

The Innovation Stack Jim McKelvey, 2020-03-10 From the cofounder of Square an inspiring and entertaining account of what it means to be a true entrepreneur and what it takes to build a resilient world changing company In 2009 a St Louis glassblowing artist and recovering computer scientist named Jim McKelvey lost a sale because he couldn't accept American Express cards Frustrated by the high costs and difficulty of accepting credit card payments McKelvey joined his friend Jack Dorsey the cofounder of Twitter to launch Square a startup that would enable small merchants to accept credit card payments on their mobile phones With no expertise or experience in the world of payments they approached the problem of credit cards with a new perspective questioning the industry's assumptions experimenting and innovating their way through early challenges and achieving widespread adoption from merchants small and large But just as Square was taking off Amazon launched a similar product marketed it aggressively and undercut Square on price For most ordinary startups this would have spelled the end Instead less than a year later Amazon was in retreat and soon discontinued its service How did Square beat the most dangerous company on the planet Was it just luck These questions motivated McKelvey to study what Square had done differently from all the other companies Amazon had killed He eventually found the key a strategy he calls the Innovation Stack McKelvey's fascinating and humorous stories of Square's early days are blended with historical examples of other world changing companies built on the Innovation Stack to reveal a pattern of ground breaking competition proof entrepreneurship that is rare but repeatable The Innovation Stack is a thrilling business narrative that's much bigger than the story of Square It is an irreverent first person look inside the world of entrepreneurship and a call to action for all of us to find the entrepreneur within ourselves and identify and fix unsolved problems one crazy idea at a time
