LLMops Abi Aryan,2025-07-10 Here s the thing about large language models they don t play by the old rules Traditional MLOps completely falls apart when you re dealing with GenAI The model hallucinates security assumptions crumble monitoring breaks and agents can t operate Suddenly you re in uncharted territory That s exactly why LLMops has emerged as its own discipline LLMops Managing Large Language Models in Production is your guide to actually running these systems when real users and real money are on the line This book isn t about building cool demos It s about keeping LLM systems running smoothly in the real world Navigate the new roles and processes that LLM operations require Monitor LLM performance when traditional metrics don t tell the whole story Set up evaluations governance and security audits that actually matter for

GenAI Wrangle the operational mess of agents RAG systems and evolving prompts Scale infrastructure without burning through your compute budget **Bank Performance Measures** Paweł Niedziółka,2025-12-16 The reforms introduced in the aftermath of the Global Financial Crisis of 2007 2009 have had the desired effect in that banks are better capitalised banks have higher liquidity buffers and the share of non performing loans is low Macroprudential policies have been implemented banking sector supervision has been overhauled and the new resolution framework gives hope that bank failures will not escalate systemic risk This book argues however that we still need to remain vigilant The world has not yet recovered from the pandemic and we are now faced with new challenges particularly climate technological and geopolitical risks affecting international trade the availability and prices of energy carriers and the cost of capital In this context it asks what measures should be used to assess a commercial bank whether as a potential shareholder client member of the bank s bodies or a supervisory institution It provides a broad overview of bank performance measures used in contemporary investment management and supervisory practice in the most important areas of a bank s activity as well as metrics that synthetically reflect the bank s standing The book evaluates a commercial bank in the context of the climate crisis and risk the growing importance of FinTech cybersecurity and AI technology as well as the challenges related to the escalation of geopolitical risk It also includes an assessment of the standing of global systemically important banks G SiBs and banking sectors in Europe indicating potential directions for changes to the tools used so far It will find a broad audience among students academics and researchers in finance and banking as well as policymakers and regulators Pawe Niedzi ka is Associate Professor and Head of the Financial Risk Management Department Institute of Banking Collegium of Socio Economics Warsaw School of Economics Poland

The Power of Modern Value Investing Gary Smith,Margaret Smith,2024-01-12 The stock market is a wild and scary roller coaster ride that investors have tried to tame with superficially appealing but ultimately flawed strategies technical analysis modern portfolio theory CAPM factor models and algos Many have simply given up and settled for indexing This book explains the fundamental flaws that make so many strategies hazardous to our wealth There is a better way what the authors call Investing 6 0 that is simple enough for anyone to use No fancy math complicated computer algorithms or long days are required This book offers a strategy with a few key principles that all investors and the financial advisors and planners who serve them can use with ease **Boom** Byrne Hobart,Tobias Huber,2024-11-19 A timely investigation of the causes of technological and scientific stagnation and a radical blueprint for accelerating innovation Read this book for the alternative history of our age Peter Thiel investor and author of Zero to One A must read for those who seek to build the future Marc Andreessen cofounder of Netscape and Andreessen Horowitz From the Moon landing to the dawning of the atomic age the decades prior to the 1970s were characterized by the routine invention of transformative technologies at breakneck speed By comparison ours is an age of stagnation Median wage growth has slowed inequality and income concentration are on the rise and scientific research has become increasingly expensive and incremental Why are we unable

to replicate the rate of progress of past decades What can we do to reinvigorate innovation In Boom Byrne Hobart and Tobias Huber take an inductive approach to the problem In a series of case studies tracking some of the most significant breakthroughs of the past 100 years from the Manhattan Project and the Apollo program to fracking and Bitcoin they reverse engineer how transformative progress arises from small groups with a unified vision vast funding and surprisingly poor accountability They conclude that financial bubbles while often maligned as destructive and destabilizing forces have in fact been the engine of past breakthroughs and will drive future advances In other words Bubbles aren't all bad Integrating insights from economics philosophy and history Boom identifies the root causes of the Great Stagnation and provides a blueprint for accelerating innovation By decreasing collective risk aversion overfunding experimental processes and organizing high agency individuals around a transcendent mission bubbles are the key to realizing a future that is radically different from the present Boom offers a definite and optimistic vision of our future and a path to unleash a new era of global prosperity

The Municipal Journal and Public Works Engineer ,1926 Robin Hood Math Noah Giansiracusa,2025-08-05

How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that's sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies more profitable But all this comes at a price It's easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It's time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You'll learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive
