**Skandalakis' Surgical Anatomy** John Elias Skandalakis, 2004      **Surgical Anatomy and Technique** Lee J.

Skandalakis, John E. Skandalakis, Panajiotis N. Skandalakis, 2009-01-09 emotional and heart warming experience even to a lion's heart and so times even brings tears to my eyes As I wrote recently in a letter published in the Bulletin of the American College of Surgeons BACS 2006 91 8 48 I believe it's time the pendulum shifted back to teaching our students the fundamentals of gross human anatomy and instilling a solid foundation on which to build After all surgeons can and will make many unnecessary and fatal accidents if they don't know surgical anatomy The reader will notice that in this edition my son Lee has taken the helm as the senior author since I am now passing through the springtime of my senility I am proud and grateful that he is continuing this work JES Acknowledgments From the initial publication of this book in 1995 through the present edition we have benefited from the support and expertise of several of Springer's medical editors The first edition came to fruition thanks to Esther Gumpert's enthusiastic assistance the second edition was bolstered by the professionalism of Beth Campbell and the current edition is the product of Paula Callaghan's skilled guidance We would like also to express our gratitude to the members of the production department at Springer for their dedicated assistance in the publishing process

Cumulated Index Medicus, 2000      *Surgical Technique of the Abdominal Organ Procurement* Andrzej

Baranski, 2009-03-01 The intention of this book is to promote a surgical technique of abdominal organ procurement in order to avoid organ damage and thus enhance the quality of retrieved organs Organ procurement from a brain death donor is an essential part of organ transplantation In donors where more than one organ is removed the surgical procedure is critically

important and could be challenging both for the procurement and recipient surgeons. Surgical injury or inadequate preservation of organs at this stage may cause irreversible organ damage or can lead to serious complications in the recipient. Nowadays local or regional surgical teams whereby the transplant surgeon is not always one of the team members perform most multiorgan donor MOD procurement procedures. To trust each other and to avoid surgical mistakes a quite training and standardization of the surgical techniques is required. Teaching and training future procurement surgeons to adopt a standard operating procedure could be the right way to prevent technical mistakes and damage during abdominal multiorgan procurement. I hope that in the near future every transplant surgeon involved in organ procurement will have to be certified. The different national and international transplant organizations in Europe have been already started to establish the teaching programs which will lead to high expertise in the field of abdominal organ procurement.
