

## SOLUTIONS

### Solution No. 1

The facility will not be transferred until the backlog of orders is completed; this demonstrates that the facility is not available for immediate sale in its present condition. The facility cannot be classified as 'held for sale' at 31 December 2020. It must be treated in the same way as other items of property, plant and equipment: it should continue to be depreciated and should not be separately disclosed.

### Solution No. 2

Because the steel works is being closed, rather than sold, it cannot be classified as 'held for sale'. In addition, the steel works is not a discontinued operation. Although at 31 December 2019 the group was firmly committed to the closure, this has not yet taken place and therefore the steel works must be included in continuing operations. Information about the planned closure could be disclosed in the notes to the financial statements.

### Solution No. 3

The delay in the timing of the transfer of the existing building imposed by the entity (seller) demonstrates that the building is not available for immediate sale. The criteria can not be met until the construction of the new building is completed. Therefore, the building is not classified as held for sale.

### Solution No. 4

Since the delay is due to circumstances beyond entity's control therefore this delay qualifies for exception to one-year condition. Hence the facility shall be classified as held for sale.

### Solution No. 5

- (a) Since the delay is due to circumstances beyond entity's control therefore this delay qualifies for exception to one-year condition. Hence the facility shall be classified as held for sale. At the end of the initial one-year period, the asset would continue to be classified as held for sale.
- (b) In that situation, the absence of a price reduction demonstrates that the asset is not available for immediate sale. Moreover, an asset must be marketed at a price that is reasonable in relation to its current fair value. Therefore, the conditions for an exception to the one-year requirement would not be met. The asset would be reclassified.

### Solution No. 6

Until 31 December 2020 the building is a normal non-current asset and its accounting treatment is prescribed by IAS 16. The annual depreciation charge was Rs. 40,000 (Rs. 2,000,000/50). As such, the carrying amount at 31 December 2020, prior to reclassification, was Rs. 1,840,000 [i.e. Rs. 2,000,000 – (4 × Rs. 40,000)].

- (a) On 31 December 2020 the building is classified as a non-current asset held for sale. It is measured at the lower of carrying amount (i.e. Rs. 1,840,000) and fair value less costs to sell (i.e. Rs. 2,200,000 – Rs. 100,000 = Rs. 2,100,000). This means that the building will continue to be measured at Rs. 1,840,000.
- (b) On 31 December 2020 the building is classified as a non-current asset held for sale. It is measured at the lower of carrying amount (i.e. Rs. 1,840,000) and fair value less costs to sell (i.e. Rs. 1,100,000 – Rs. 100,000 = Rs. 1,000,000). The building will therefore be measured at Rs. 1,000,000 as at 31 December 2020. An impairment loss of Rs. 840,000 will be charged to the statement of profit or loss.
