Skilled Interpersonal Communication Owen Hargie, 2010-09-13 There is a fundamental powerful and universal desire amongst humans to interact with others. People have a deep seated need to communicate and the greater their ability in this regard the more satisfying and rewarding their lives will be. The contribution of skilled interpersonal communication to success in both personal and professional contexts is now widely recognised and extensively researched. As such knowledge of various types of skills and of their effects in social interaction is crucial for effective interpersonal functioning. Previous editions have established *Skilled Interpersonal Communication* as the foremost textbook on communication. This thoroughly revised and expanded 5th edition builds on this success to provide a comprehensive and up to date review of the current research theory and practice in this burgeoning field of study. The first two chapters introduce the reader to the nature of skilled interpersonal communication and review the main theoretical perspectives. Subsequent chapters provide detailed accounts of the fourteen main skill areas namely nonverbal communication, reinforcement, questioning, reflecting, listening, explaining, self disclosure, set induction, closure, assertiveness, influencing, negotiating and interacting in and leading group discussions. Written by one of the foremost international experts in the field and founded solidly in research this book provides a key reference for the study of interpersonal communication. This theoretically informed yet practically oriented text will be of interest both to students of interpersonal communication in general and to qualified personnel and trainees in many fields.

Discourse Markers in Doctoral Supervision Sessions Samira Bakeer, 2023-09-29 Language is a complex system that transfers ideas, feelings, experiences, beliefs, and cultures to others. One of the interactional resources that are utilised to make this transmission more coherent and effective is Discourse Markers (DMs). This monograph analyses these markers in doctoral supervisions but uses a multimodal approach to provide a deeper understanding of these DMs and uncovers potential hidden meanings that would escape a purely verbal analysis. Using a dataset consisting of a corpus of video recorded doctoral supervision meetings, this book provides an innovative and cutting edge approach to the analysis of DMs and sheds new light on the complexity and dynamicity of naturally occurring discourse where meaning making rests on a close coordination of both verbal and embodied conducts. The book makes very useful reading for scholars in the fields of discourse markers, conversation analysis, corpus linguistics, and multimodality. It could collaterally be appealing to anyone simply interested in the study of human communication
