Communication Skills provides a step by step approach for those looking to gain a theoretical and practical understanding of using counselling and communication skills within the helper role and applying these skills in the context of professional practice. This revised edition is brought up to date with new content around the subjects of working online, working across difference and diversity, coaching, grief and loss, and managing challenging situations. Written in a clear and accessible teaching style, this book progresses through the initial helper communication skills that are used in everyday life to the more complex and in-depth counselling skills required in a helper relationship. It introduces the reader to a Relational Skills model which demonstrates the phases of relationship development. The authors show what happens within each phase and identify how and when to use skills appropriately. Knowledge of reflective practice aspects of the relationship and how to manage change ensures the text considers the full range of general and specific skills and abilities required. Learning is brought alive through the use of online video clip sessions of a real helper-client relationship giving the reader opportunities and encouragement to reflect and evaluate their learning. This book will be an essential resource for students taking an introductory counselling skills course, other trainees within the mental health sector, coaches and many other qualified professionals who wish to enhance their knowledge of embedding counselling skills into their work and practice.

Pharmacotherapy Casebook: A Patient-Focused Approach, 10/E Terry L. Schwinghammer, 2017-06-22. More than 150 patient cases teach you how to apply the principles of pharmacotherapy to real world clinical practice. The essential study companion to DiPiro's *Pharmacotherapy: A Pathophysiologic Approach* 10th Edition, *Pharmacotherapy Casebook: A Patient Focused Approach* uses 157 patient cases to help you develop the skills necessary to identify and resolve the most common drug therapy problems encountered in daily clinical practice. The case chapters are organized into organ system sections that correspond to those of the companion textbook. This proven effective case based approach makes the book perfect for PharmD, Nursing, Nurse Practitioner and other allied health courses. Sharpen your ability to Identify actual or potential drug therapy problems. Determine the desired therapeutic outcome. Evaluate therapeutic alternatives. Design an optimal individualized pharmacotherapeutic plan. Develop methods to evaluate the therapeutic outcome. Provide patient education. Communicate and implement the pharmacotherapeutic plan. Develop expertise in pharmacotherapy decision making with realistic patient presentations that include medical history, physical examination and laboratory data followed by a series of questions using a systematic problem solving approach. A compelling range of cases from a single disease state to multiple disease states and drug related problems. Expert coverage that integrates the biomedical and pharmaceutical sciences with therapeutics. Appendices containing valuable information on medical abbreviations, laboratory tests, mathematical conversion factors and anthropometrics.
