Sino Us Energy Triangles Resource Diplomacy Under Hegemony Politics In Asia:

Sino-U.S. Energy Triangles David Zweig, Yufan Hao, 2016 The remarkable performance of the Chinese economy in the last three decades has placed China at the centre of the world stage In 1993 China became a net importer of energy although it was not until the early 2000s that the world began to pay more attention to China's energy needs and its potential impact on the world With China's energy search occurring within a hegemonic global structure dominated by the United States the US watches with interest as China enhances its ties with energy rich states The book examines this triangular relationship and questions whether the US and China are

Regional Community Building in East Asia Lee Lai To, Zarina Othman, 2016-09-01 This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia Unlike other works written by scholars outside ASEAN or East Asia it offers an insider's point of view of the 10 ASEAN states China Japan and South Korea on regional community building While a nationalist perspective may permeate throughout the study it is also clear that pursuing regional cooperation is considered to be important by the respective author denoting the non exclusivity between nationalism and regionalism and the mutual reinforcement of the two Each author of this volume has made a deliberate effort to introduce and survey the developmental challenges and experiences of his or her country from a historical perspective All authors without exception have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China Japan and South Korea in political security economic and socio cultural terms Their papers also reveal that the self help and self strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits In the meantime it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study One can argue that bilateral interactions are the building block of multilateralism interactions To be sure there is a deliberate effort in this study to highlight unity in diversity in East Asia in general and ASEAN in particular

Political Survival and Yasukuni in Japan's Relations with China Mong Cheung, 2016-06-17 What role does the political survival of prime ministers play in Japan's relations with China over the Yasukuni issue Three Japanese prime ministers including Nakasone Yasuhiro Hashimoto Ryutaro and Abe Shinzo complied with China's demands and stopped visiting the controversial Shrine in 1986 1997 and 2007 respectively By contrast the Yasukuni controversy intensified between 2001 and 2006 when a popular Prime Minister Koizumi Junichiro was determined to pay regular homage to the Yasukuni Shrine annually Prime Minister Abe who previously demonstrated restraint over the issue in his first term between 2006 and 2007 visited the Yasukuni unexpectedly in 2013 but not in 2014 or 2015 To explain this variation this book presents an alternative interpretation of Japan's official responses toward China's pressure over the Yasukuni issue between 1985 and 2015 by applying a political survival approach that highlights the domestic political legitimacy of the Japanese prime minister or the ruling party This book will be of great interest to students and researchers of Sino Japanese relations Japan's foreign policy and international relations

Handbook on the International Political Economy of China Ka Zeng, 2019 This book examines the processes evolution and consequences of China's rapid integration into the global economy Through analyses of Beijing's international economic engagement in areas such as trade investment finance sustainable development and global economic governance it highlights the forces shaping China's increasingly prominent role in the global economic arena Chapters explore China's behavior in global economic governance the interests and motivations underlying China's international economic initiatives and the influence of politics including both domestic politics and foreign relations on the country's global economic footprint

China's Global Energy Expansion Xiaohan Gong, 2024-10-03 Should Chinese energy investments be excluded from the liberal economic system based on geopolitical assessments only This book explores the potential regulatory control by the Chinese government over foreign energy investments to achieve their perceived strategic objectives Host states in which Chinese energy companies make investments have increasingly opposed Chinese energy investments in their national security reviews based on concerns that these investments have strategic objectives The book analyses China's investment related law regulations and energy policies to examine how overseas energy investment making is governed The book also explores the role of the Chinese government in energy investment promotion and protection Uniquely the examination of China's potential regulatory control provides an objective criterion rather than geopolitical considerations for host states to assess the nature of Chinese energy investments The book helps readers to open the black box of Chinese energy investments from a regulatory perspective It is a useful resource for researchers as well as practising lawyers assisting their Chinese clients through national security reviews or when trying to determine whether China's SOEs can bring cases before investor state arbitration tribunals

Central Asia in the Era of Sovereignty Daniel L. Burghart, Theresa Sabonis-Helf, 2018-03-16 After twenty five years of independence there is little doubt that the five Central Asian states will persist as sovereign independent states They increasingly differ from each other and are making their way in global politics No longer connected only to Russia they are now connected in important ways to Afghanistan South Asia China Iran and each other This volume covers a wide range of issues and presents the work of emerging scholars authors well known for their expertise in the region The first part addresses social issues Covering a wide range from HIV AIDs to social media the rebirth of Islam outmigration and problematic borders this section follows two main currents political development in the region and states responses to transboundary challenges The second part addressing economics and security provides analyses of new infrastructure informal economies from bazaars to criminal networks energy development the role of enclaves in the Ferghana Valley and the development of the states military structures This section illuminates the interactions between economic developments and security and the forces that could undermine both The final part comprised of five case studies offers a deeper dive into a specific factor that matters in the development of each Central Asian state These cases include Kazakhstan's foreign policy identity Kyrgyzstan's domestic politics Tajikistan's pursuit of hydropower foreign direct

investment in Turkmenistan and the perception of everyday corruption in Uzbekistan Sustainable Development in Asia Bernadette Andreosso-O'Callaghan, Serge Rey, Robert Taylor, 2022-04-28 This book examines the current main sustainable development issues in Asia from a socio economic macroeconomic and financial perspective beyond a plain environmental context The book further analyzes both financial or health crises which jeopardize the economic sustainability of countries particularly in Asia where a sustained economic growth path is an occurrence of the recent past By doing so the volume presents case studies on countries such as China Japan South Korea and ASEAN countries like Thailand In some instances the book provides a comparative analysis of the experience of European Union countries The book is divided into two parts The first part presents contributions with socio economic perspectives under the broad heading of sustainable development Each contribution examines a specific Asian country Additionally it looks into China's rise in adjacent regions like the Middle East discussing China's positioning in the world in the current post Covid19 context The second part presents the experiences of a number of Asian countries in terms of financial and economic perspectives including an analysis of the issue of sovereign debt The book further examines broader topics like the sustainability of the top financial centers and micro finance The volume is a must read for scholars students and practitioners interested in a better understanding of sustainable development issues in Asia in particular and economics in general *Government Reports Announcements & Index*, 1996

China's Energy Relations with the Developing World Carrie Liu Currier, Manoj Dorraj, 2011-01-20 China's Energy Geopolitics Thrassy N. Marketos, 2008-11-21 China's need for energy has become a driving factor in contemporary world politics and a precondition for sustaining China's continuing high economic growth This book argues that a US presence in Central Asia is necessary for securing the energy provision of China from the region *The Troubled Triangle* T. Inoguchi, G. Ikenberry, 2013-05-07 The US China and Japan form a troubled triangle with each country negotiating its foreign policy toward the other two in response to economic and security pressures that operate as an interrelated duality Written by international relations experts this book examines how the three countries respond to this set of pressures and to each other

Hegemony, Not Anarchy Peter Van Ness, 2001 **An Introduction to Energy Diplomacy** Haiyun Wang, Qinhua Xu, 2022-03-05 This book discusses the basic and cutting edge theories in the area of energy diplomacy in the global context focusing on topics such as international dialogues on energy government directed partnerships international energy games the activities of international agencies and public energy diplomacy It also analyzes in detail the relationship between global energy diplomacy and international energy while at the same time identifying the major problems of China's energy diplomacy to provide a framework for the country's energy diplomacy strategy an essential component of China's overall diplomatic strategy **China-US Great-Power Rivalry** Lai-Ha Chan, Pak K. Lee, 2024-04-19 This edited volume examines the competitive dynamics of two order building projects in the Indo Pacific namely China's Belt and Road Initiative BRI and the US led Free and Open Indo Pacific FOIP Foci are on how far the two major powers are able to use institutional projects to

re order the region of the Indo Pacific to suit their policy preferences and on how regional powers perceive and navigate between the two ordering projects This book discusses a wide array of actors in the Indo Pacific covering the two major powers of China and the United States middle powers of Australia and New Zealand India Japan South Korea and Taiwan and institutional actors of ASEAN AUKUS the Quad and the Pacific Islands Forum Drawing on the concept of international order the chapters examine the actor specific foreign policies in relation to the rivalry between the FOIP and the BRI This accessible book will be a go to resource for anyone looking for how the two great powers garner legitimacy and followership for their own version of ordering project and how regional powers respond to the dynamic competition and navigate between China and the United States and between the forces of liberal democracy and autocracy **US-Chinese Strategic**

Triangles S. Mahmud Ali, 2017-06-07 This book reveals the nature of Sino US strategic competition by examining the influence exerted by major secondary stakeholders e g Japan Russia India the Koreans and ASEAN on the two powers USA and its rival China who consider each other as a source of greatest challenges to their respective interests By adopting strategic triangles as the analytical framework and assessing triangular relational dynamics such as US China Japan or US China Russia the author illustrates how secondary stakeholders advance their own interests by exploiting their respective linkages to the two rivals thereby shaping Sino US competitive dynamics This work adds a regional and multivariable perspective to the understanding of the Indo Pacific's insecurity challenges **The Domestic Dynamics Of China's Energy Diplomacy**

Chi Zhang, 2015-09-17 Since the beginning of the 21st century China's energy diplomacy has been expanding rapidly and the country is searching for energy resources worldwide This movement has not only improved China's energy security and international relations but also enabled the Chinese national oil companies NOCs to access new investment markets and implement development strategies The Chinese government and the NOCs need each other's support to realise their respective interests The interaction between the government and the NOCs will have a critical influence on China's energy diplomacy The Domestic Dynamics of China's Energy Diplomacy explores the long neglected domestic dynamics of China's energy diplomacy in particular the interaction of national and corporate interests It argues that the convergence of national and corporate interests is the key momentum of China's energy diplomacy It observes that the government NOC relationship has been evolving with China's economic and enterprise reform Finally it tests the empirical evidence of the domestic dynamics of China's energy diplomacy against the three mainstream international political economy theories showing their merits and shortcomings in explaining the phenomenon before providing an alternative conceptualisation of the movement

The Strategic Implications of China's Energy Needs Philip Andrews-Speed, Xuanli Liao, Roland Dannreuther, 2014-08-27 China is frequently described as a threat to regional and global stability and its rapidly rising demand for imported energy is seen as one cause of this threat This book shows that domestic politics and foreign policy have both played a part in China's recent major energy policy decisions However China's increasing involvement in the global energy markets can be seen as an

opportunity to enhance cooperation and interdependence rather than as a threat Xi Jinping on the Global Stage Robert D. Blackwill, Kurt M. Campbell, 2016-02-01 In light of China's deepening economic slowdown China's foreign policy may well be driven increasingly by the risk of domestic political instability write Robert D Blackwill Henry A Kissinger senior fellow at the Council on Foreign Relations CFR and Kurt M Campbell the Asia Group's chairman and chief executive officer in a new Council Special Report Economic growth and nationalism have for decades been the two founts of legitimacy for the Communist Party and as the former wanes Chinese leader Xi Jinping will likely rely increasingly on the latter Xi's dominance of the decision making process has made him a powerful but potentially exposed leader the authors note To protect his position Xi will most probably stimulate and intensify Chinese nationalism long a pillar of the state's legitimacy to compensate for the political harm of a slower economy to distract the public to halt rivals who might use nationalist criticisms against him and to burnish his own image The report Xi Jinping on the Global Stage Chinese Foreign Policy Under a Powerful but Exposed Leader notes that China's economy which had expanded at an annual rate of 10 percent for three decades is entering a new era of considerably slower growth To strengthen his position at home Xi will probably intensify his personality cult crack down even harder on dissent and grow bolder in using the anticorruption campaign against elites who oppose him Internationally Xi may provoke disputes with neighbors use increasingly strident rhetoric in defense of China's national interests and take a tougher line in relations with the United States and its allies to shift public focus away from economic troubles To deal with Xi's more assertive foreign and defense policies the authors call for a new American grand strategy for Asia that seeks to avoid a U S China confrontation and maintain U S primacy in Asia The authors both former senior government officials with extensive experience in the region recommend passing the Trans Pacific Partnership an Asia centered trade deal with countries that represent approximately 40 percent of the global economy lifting constraints on U S exports of oil to Asian allies and maintaining a commitment to deploy at least 60 percent of the U S Navy and Air Force in the Asia Pacific They identify the U S pivot or rebalance to Asia as the indispensable ingredient in a successful U S policy to participate and project strength more consequentially in the region and to deal with Chinese power and influence under Xi Jinping *Looking for Balance* Steve Chan, 2013-07-15 Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U S military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal

reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance **China's Western Horizon** Daniel Seth Markey,2020

This book explains how China s new foreign policy initiatives like the vaunted Belt and Road are being shaped by local and regional politics outside China and assesses the political implications of these developments for Eurasia and the United States It depicts the ways that President Xi Jinping s China is zealously transforming its national wealth and economic power into tools of global political influence and details these developments in South Asia Central Asia and the Middle East Drawing from extensive interviews travels and historical research it describes how perceptions of China vary widely within states like Pakistan Kazakhstan and Iran Eurasia s powerful and privileged groups often expect to profit from their connections to China while others fear commercial and political losses Similarly statesmen across Eurasia are scrambling to harness China s energy purchases arms sales and infrastructure investments as a means to outdo their strategic competitors like India and Saudi Arabia while negotiating relations with Russia and America The book finds that on balance China s deepening involvement will play to the advantage of regional strongmen and exacerbate the political tensions within and among Eurasian states To make the most of America s limited influence in China s backyard and elsewhere it argues that U S policymakers should pursue a selective and localized strategy to serve America s aims in Eurasia and to better compete with China over the long run
