**Transnational Crime and Global Security** Philip L. Reichel, Ryan Randa, 2018-01-12 This two volume work offers a comprehensive examination of the distressing topics of transnational crime and the implications for global security. National security is a key concern for individual nations, regions, and the global community, yet globalism has led to the perfusion of transnational crime such that it now poses a serious threat to the national security of governments around the world. Whether attention is concentrated on a particular type of transnational crime or on broader concerns of transnational crime generally, the security issues related to preventing and combatting transnational crime remain of top priority concern for many governments. *Transnational Crime and Global Security* has been carefully curated to provide students, scholars, professionals, and consultants of criminal justice and security studies with comprehensive information about and in-depth analysis of contemporary issues in transnational crime and global security. The first volume covers such core topics as cybercrime, human trafficking, and money laundering, and also contains infrequently covered but nevertheless important topics including environmental crime, the weaponization of infectious diseases, and outlaw motorcycle gangs. The second volume is unique in its coverage of security issues related to such topics as the return of foreign terrorist fighters using big data to reinforce security and how to focus efforts that encourage security cooperation.

**Environmental Criminology and Crime Analysis** Richard Wortley, Michael Townsley, 2016-11-01 Environmental criminology is a term that encompasses a range of overlapping perspectives. At its core, the many strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime and a conviction that careful analyses of these environmental influences are the key to the effective investigation, control, and prevention of crime. This new edition brings together leading theorists and practitioners in the field to provide a comprehensive, integrative coverage of the field of environmental criminology and crime analysis. This book is divided into three sequential parts. Understanding the crime event explores routine activity approach, crime pattern theory, the rational choice perspective, and situational precipitators of crime. Analysing crime patterns discusses crime mapping, offender mobility, repeat victimisation, geographic profiling, and crime scripts. Preventing and controlling crime covers topics including problem oriented policing, situational crime prevention, and environmental design. Fully updated and including new chapters on crime scripts and offender mobility, a scene setting introductory overview, and critical thinking questions at the end of each chapter, this text is an essential and comprehensive resource for practitioners and students taking courses on environmental criminology, crime analysis, and crime prevention.
