Popular Mechanics ,1967 **Libya and the Global Enduring Disorder** Jason Pack,2022-02-15 We no longer inhabit a world governed by international coordination a unified NATO bloc or an American hegemon Traditionally the decline of one empire leads to a restoration in the balance of power via a struggle among rival systems of order Yet this dynamic is surprisingly absent today instead the superpowers have all at times sought to promote what Jason Pack terms the Enduring Disorder He contends that Libya s ongoing conflict more so than the civil wars in Yemen Syria Venezuela or Ukraine constitutes the ideal microcosm in which to identify the salient features of this new era of geopolitics The country s post Qadhafi trajectory has been molded by the stark absence of coherent international diplomacy while Libya s incremental implosion has precipitated cross border contagion further corroding global institutions and international partnership Pack draws on over two decades of research in and on Libya and Syria to highlight the Kafkaesque aspects of today s global affairs He shows how even the threats posed by the Arab Spring and the Benghazi assassination of US Ambassador J Christopher Stevens couldn t occasion a unified Western response Rather they have further undercut global collaboration demonstrating the self reinforcing nature of the progressively collapsing world order *Corpus Juris ...
