Sources in the History of Medicine Robin Leslie Anderson,2007 For courses in the history of medicine This reader gives students in a history of medicine class or the general reading public a broad selection of readings about the many ways that disease and trauma have affected human populations over time It draws from both primary and secondary sources to give a dual perspective of a what was written at the time of various events and b what modern scholars have been able to ascertain from historical evidence It has a broad scope both in time and space covering materials from earliest Man to contemporary bioethical problems and contains materials from India China Latin America and the Muslim worlds as well as Europe and the United States Rather than simply looking at great medical discoveries it is purposely focused on how trauma and disease have been daily companions of human existence It fills a serious void in teaching materials in the history of medicine by taking a world perspective using a combination of primary and secondary sources covering a huge time span and putting emphasis on the problems created by medical progress and most importantly focusing on the effect that medical practices have had on ordinary people throughout history Global Epidemics Christopher Mari,2007 Explores historic ongoing and anticipated outbreaks including influenza AIDS and bird flu and examines responses by government and health care organizations *Senior High Core Collection* Raymond W.
