**Urban Futures** Mark Burry,2020-09-01 Given the rapid evolution of concepts such as smart cities who are the architects riding the wave of new possibilities for urban design How do contemporary agencies find pathways to understand the challenges and opportunities presented by evolving urban technology and how does architecture engage with the expanding pool of associated disciplines How should schools of architecture and urban design engage with radical digitalised urbanism This issue of AD claims that this is contested territory The two dimensionality of planners urban construct is as limited as engineers predilection to zero in and solve problems Urban Futures contends that society needs a much broader professional brush than has been applied in the past interdisciplinary urban design professionals who can

reach across the philosophy and mundanity of urban existence with a creative eye The issue identifies a selection of internally resourceful visionaries who combine sociology geography logistics and systems theory with the practical realities and challenges of mobility sustainable materials food water and energy supply and waste disposal Crucially they seek to ensure better urban futures and a civil and convivial urban experience for all city dwellers Contributors Refik Anadol Philip Belesky Shajay Bhooshan Jane Burry and Marcus White Thomas Daniell Vicente Guallart Shan He Wanyu He Dan Hill Justyna Karakiewicz Tom Kvan Areti Markopoulou Ed Parham Carlo Ratti Ferran Sagarra and Bige Tuner Featured architects Arup Digital Studio Guallart Architects Space10 Space Syntax UNStudio and XKool Technology **iPad & iPhone**

Aquilina Nigel Coates Peter Cook Paul Finch Mark Garcia Clare Hamman John Lyall Bruce McLean Will McLean Kester Rattenbury Marcos Rosello and Neil Thomas     **Housing as Intervention** Karen Kubey, 2018-08-28 Across the world the housing crisis is escalating. Mass migration to cities has led to rapid urbanisation on an unprecedented scale while the withdrawal of public funding from social housing provision in Western countries and widening income inequality have further compounded the situation. In prosperous US and European cities middle and low income residents are being pushed out of housing markets increasingly dominated by luxury investors. The average London tenant for example now pays an unaffordable 49 per cent of his or her pre tax income in rent. Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock coupled with rapidly shifting ways of life. In response to this context forward thinking architects are taking the lead with a collaborative approach. By partnering with allied fields working with residents developing new forms of housing and leveraging new funding systems and policies they are providing strategic leadership for what many consider to be our cities most pressing crisis. Amidst growing economic and health disparities this issue of AD asks how housing projects and the design processes behind them might be interventions towards greater social equity and how collaborative work in housing might reposition the architectural profession at large. An architecture of impact uses advanced digital techniques in such a way that its material assembly supersedes its use of the digital. Until now this type of architecture has been formally and materially bound by restrictive conventional methodologies which the digital project has moved from the scale of installations to three dimensional building sized fabrications. Unless architects turn to a new culture of making, architecture shaped by even innovative digital technology will become irrelevant. Architectural projects that are more subversive in how they are created and that lose their digital signature have greater potential to be at the forefront of the discipline's new materialisations. This issue illustrates these ideas and their architectural impact. ### **Re-Imagining the Avant-Garde**

Matthew Butcher, Luke C. Pearson, 2019-08-05 The 1960s and 1970s avant garde has been likened to an architectural Big Bang such was the intensity of energy and ambition in which it exploded into the postwar world. Marked out by architectural projects that redefined the discipline it remains just as influential today. References to the likes of Archizoom Peter Eisenman John Hejduk and Superstudio abound. Highly diverse the avant garde cannot be defined as a single strand or tendency. It was divergent geographically reaching from Europe to North America and Japan and in its political formal and cultural preoccupations. It was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval the Paris riots of May 1968 the anti Vietnam war movement in America and the looming ecological crisis. Re imagining the Avant garde outlines how in contemporary architectural practice avant garde projects retain their power as historical precedents as barometers of a particular design ethos as critiques of society and instigators of new formal techniques. Given the far reaching impact of the subsequent digital revolution which has since reshaped every aspect of practice the issue asks why this historical period continues to retain its undeniable grip on current architecture.
