Edward Anderson, 1988 A collection of facts and information designed to improve daily health and living [Managing your Mental Health during your PhD](#) Zoë J. Ayres, 2022-09-14 This book explores the PhD experience as never before and provides a survival guide for current and prospective PhD students The book investigates why mental health issues are so common among the postgraduate population going beyond the statistics looking at lived experience of both the author and as well as current PhD students who have found balancing mental wellness with the PhD endeavour challenging The author discusses tips and tricks she wished she had known at the start of her PhD process for managing mental health such as managing imposter feelings prioritising workload and self care strategies to help others throughout their own journey The book goes beyond typical mental health discussions where the focus for improving mental health is placed on PhD students to become

more resilient and explores some of the often unspoken environmental factors that can impact mental health. These include the PhD student supervisor relationship, the pressure to publish and deep systemic problems in academia such as racism, bullying and harassment. Finally the book is a call to action providing tangible improvements from the author's perspective that university institutions can make to ensure that academia is a place for all to thrive.

**Stress Management** Pardess Mitchell, 2023-12-12

Everyone experiences stress in their lives. While it is a natural response to challenges, stress can have debilitating effects on both physical and mental health. Stress Management offers a fresh look at and effective strategies for managing stress and building resilience across six dimensions of wellness: physical, emotional, intellectual, social, spiritual, and environmental. This foundational text takes a holistic approach to managing stress, detailing the effects of stress on the body and outlining techniques that examine root causes and proactive responses to stressors. Stress Management offers a range of coping strategies that will help students formulate a well-rounded plan to tackle stress from multiple angles before it occurs, while it is occurring, and after it occurs. That model is centered on four primary pillars: Source management, reducing or eliminating stress at its source, Relaxation employing techniques for breathing, meditation, and rest to focus the mind and relax the body, Thought management adopting a thought process to better manage the stressor, Prevention avoiding stress when possible. The book also offers practical tools to help students learn how to identify their triggers, practice self-care, and leverage support, including knowing when to seek professional help when necessary. To further aid in applying the strategies to their own lives, the text includes these features: Case studies with discussion questions that prompt students to consider real-world scenarios and contemplate ways to solve those stressors, Research Spotlight elements that present current issues and hot topics related to stress, Online learning tools delivered through HKPropel including audio mini lectures and short interviews, self-discovery activities, chapter quizzes that are automatically graded and provide immediate feedback, and vocabulary flash cards and quizzes. Stress Management is a timely and highly practical book that offers students a deeper understanding of stress and its effects on overall wellness. It guides them in putting together a stress management plan that will help them be healthy in all aspects of their lives. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.
