Harrison (Jr.), ARINC RESEARCH CORP ANNAPOLIS MD., 1986 Title 10 Section 2403 of the United States code requires that a warranty be included in procurement contracts for weapon systems. This has generated a great deal of concern from both military and industry. The nearly all inclusive nature of the warranty law imposed without much time for phase in has presented a severe challenge to the military contracting office program office and logistics community to serve and implement effective warranties at a reasonable price. Contractors face similar challenges. They are now required to warrant 1 that delivered equipment conforms to the design and manufacturing requirements 2 that the equipment is free from defects in materials and workmanship and 3 that deployed systems will meet specified essential performance requirements. This handbook is designed to aid program managers of all the military services in meeting the requirements of the warranty law. The handbook addresses a wide range of topics from warranty acquisition strategy to development of terms and conditions through planning for the operational phases Commercial and Consumer Warranties - Drafting, Performing & Litigating Julian B. Product Warranties United States. National Business Council for Consumer Affairs. Sub-Council on Warranties and Guarantees, 1972 Durable Good, Extended Warranty and Channel Coordination Preyas S. Desai, Paddy Padmanabhan, 2004 The marketing literature on product warranty and extended warranty has largely focused on their role as segmentation instruments in risk averse consumer markets. Preserving this insurance rationale we highlight the role of extended warranty in channel coordination. We derive explicit demand functions for the durable good and extended warranty from a traditional model of consumer utility. This derivation explicitly captures the complementary goods flavor of extended warranty. We then investigate the impact of different distributional arrangements commonly observed in the marketplace for market outcomes and manufacturer profitability. We show that two key forces drive the results: the complementary goods effect and the double marginalization effect. Different channel arrangements for marketing of extended warranty cause these effects to occur at different levels within a distribution channel and these are shown to have significant implications for the optimal warranty policy.
