**Communicating Science to the Public** Leo Tan Wee Hin,R. Subramaniam,2014-07-24 This book explores effective approaches for communicating science to the public in developing countries Offering multiple perspectives on this important topic it features 17 chapters that represent the efforts of 23 authors from eight countries Australia Bangladesh India Ireland New Zealand USA Singapore and South Africa Inside readers will find a diversity of approaches to communicate science to the public The book also highlights some of the challenges that science communicators science policy makers science

teachers university academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries. In addition it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond. Given the pervasive influence of science and technology in today's society their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter linked. This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology.

**Supported by the Pacific Science Association Hawaii** *Drones - Various Applications* Dragan Cvetković, 2024-02-07

Although many believe that unmanned aerial vehicles or drones are a recent invention unmanned flight has a rich history that goes all the way back to ancient times. The first systems that can be specified under the modern definition of unmanned aerial vehicles or drones include reconnaissance drones developed and deployed during the Cold War period. Today such systems have evolved and can have different designs. In the last twenty years many drones with different aerodynamic characteristics flight endurance methods and places of launch and acceptance and even more diverse purposes have been developed. The achievements of modern science technique and technology especially in the field of microelectronics and control systems have made it possible to design and manufacture drones that are capable of performing controllable flight in a wide range of altitudes speeds and distances while performing complex and diverse tasks with almost the same efficiency as well as manned aircraft. This book provides a comprehensive overview of drone technology and applications with chapters on the detection and classification of drones issues related to electric unmanned aerial vehicles integrating drones into educational curricula and the uses of different types of drones in various situations among other topics.

*Serving Teens and Adults on the Autism Spectrum* Carrie Rogers, 2020-10-01

Understand the unique needs of teens and adults with autism and how to adapt existing library programs to be more inclusive. Autism spectrum disorder is a lifelong condition but programs and services are mostly for children. As this population ages and the number of adults receiving autism diagnoses grows are public libraries serving this group. *Serving Teens and Adults on the Autism Spectrum* offers practical strategies for delivering better service to individuals with autism from library programming to technology collections library volunteers and the information desk. Relying on feedback and help from the autism community in her area Carrie Rogers Whitehead created programs for children teens and young adults on the autism spectrum. In this book she shares advice on developing programs that focus on teamwork transitions and social skills. She explains best practices for reference interviews and teaches readers how their libraries can partner with nonprofit and government entities to develop workforce skills and connect adults with autism to jobs. Ready made program activities for teens and adults with autism make it easy for libraries to better serve this often misunderstood group.

Teacher's Guide Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students and video clips to support both students and teachers.

**Teaching Science in Elementary and Middle School** Joseph S. Krajcik, Charlene M. Czerniak, 2018-06-12. Teaching Science in Elementary and Middle School integrates principles of learning and motivation with practical teaching ideas for implementing them. Paralleling what scientists do, project based learning (PBL) represents the essence of inquiry and the nature of science and engages children and teachers in investigating meaningful real world questions about the world around them. This text provides concrete strategies on teaching using a project based approach and on meeting the principles in A Framework for K-12 Science Education and the Next Generation Science Standards. NGSS Features include strategies for planning long term interdisciplinary student centered units scenarios to help readers situate new experiences and a wealth of supplementary material on the Companion Website. Features in the Fifth Edition Integrates research based findings from the National Research Council's *Taking Science to School: A Framework for K-12 Science Education* and NGSS to engage learners and help them make sense of phenomena in using disciplinary core ideas, science and engineering practices and crosscutting concepts. Gives attention to cultural diversity throughout the chapters with an added focus on working with English Language Learners. Describes how to develop and use assessments that require students to make use of their knowledge to solve problems or explain phenomena. Illustrates how to use PBL to make connections to Common Core Standards for Mathematics and English Language Arts. Provides examples of project based lessons and projects to illustrate how teachers can support children in engaging in scientific and engineering practices such as asking questions, designing investigations, constructing models and developing evidence based explanations.
