The Very Long Game Heiko Borchert, Torben Schütz, Joseph Verbovszky, 2024-07-18 This open access book is the outcome of a unique multinational effort organized by the Hamburg based Defense AI Observatory DAIO to portray the current state of affairs regarding the use of artificial intelligence AI by armed forces around the world. The contributions span a diverse range of geostrategic contexts by providing in depth case studies on Australia, Canada, China, Denmark, Estonia, Finland, France, Germany, Greece, India, Iran, Israel, Italy, Japan, the Netherlands, Russia, Singapore, South Korea, Spain, Sweden, Taiwan, Turkey, Ukraine, the UK and the United States. The book does not speculate about the future implications of AI on armed forces but rather discusses how armed forces are currently exploring the potential of this emerging technology. By adopting a uniform analytical framework each case study discusses how armed forces view defense AI, how they are developing AI enhanced solutions adapting existing structures and processes and funding their defense AI endeavors to what extent defense AI is already fielded and operated and how soldiers and officers are being trained to work with AI.

Law, Death, and Robots Keri Grieman, 2024-10-17 Can the law keep up with AI? This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future. While AI moves quickly, regulation follows more slowly, an increasing problem for an evolutionary fast paced emerging technology. AI has the potential to save lives but in doing so will have the potential to take them as well. How do we future proof law and regulation to incentivise life saving innovation as safely as possible? This book details how to regulate AI in high risk civil applications for example automated vehicles and medicine, addressing both liability and regulatory structure. It highlights crucial liability themes for technology governance, provides tools to bridge the gap between regulators and technologists, examines jurisdictional approaches to AI regulation in the EU, UK, USA and Singapore, and ultimately suggests a jurisdiction agnostic blueprint for regulation.
