He has written several books in the In 30 Minutes series, including: Dropbox In 30 Minutes, Twitter In 30 Minutes, and Excel Basics In 30 Minutes. Here's what readers are saying about Google Drive and Docs In 30 Minutes: I am so glad this was made. I've been using Google Docs for a while now and have been encouraging my teacher colleagues to do so as well to facilitate collaboration. It has become my go to text book to help new users understand quickly. If you're new to Google Drive or Google Documents, this will help you. If you're experienced and want something to help those who come to you with questions, this is a nice tool to help them remember what you show them. I highly recommend it. I just got a new position that requires record keeping. Having used Google Docs in the past, I decided to update my knowledge. I googled Docs for dummies and this was one of the results. I liked the concept that the title implies: a concise guide that will distill what I need and allow me to complete a task quickly. A clear and concise explanation of how to navigate your way through Google Docs. Excellent introduction to Google Drive. Well researched, easy to read, nicely organized.

Linux for Makers Aaron Newcomb, 2017-04-11 Linux is a powerful open source operating system that has been around for many years and is widely used for running servers and websites But most students and Makers encounter it for the first time when they are working on projects with their Raspberry Pi or similar single board computers SBCs such as BeagleBone Black or Intel Galileo Linux for Makers is the first book that explains the Linux operating system specifically for Makers as opposed to programmers and administrators By gaining a deeper understanding of Linux Makers can add another useful tool to their kit that will help them build their projects more easily Written with the Maker in mind this book will focus mostly on Raspbian running on the Raspberry Pi as it is the most prolific in the ecosystem today However most of the topics covered will apply broadly to other Linux distributions and will be called out when they may differ Many times users cut and paste from a website tutorial into the Linux command line without understanding what they are actually doing only to be frustrated when they want to modify or tweak something to suit their needs Also many Makers shy away from using the Raspberry Pi or similar board because they feel Linux is too foreign and they think using a command line will be more difficult than using a GUI This book aims to overcome those fears and provide a foundation for further learning and exploration To that end this book will focus on the basic principles that a Maker would need to know as opposed to other resources that go into detail that is not particularly relevant to building projects
