**Dr. Manmohan Singh- A Decade of Decay** M.R.Venkatesh, 2013-07-11 This Book is a compilation of select articles authored by M R Venkatesh mostly in Rediff.com. To the reader his writings offer a ring side view of the debilitating state of affairs in India under the leadership of Dr Manmohan Singh. With a persuasive, passionate and powerful style of writing, the author demystifies the challenges confronting India and Indian economy in a manner that is comprehensible even to the layman. Making a strong case for a small yet effective government, Venkatesh canvasses for sweeping economic, administrative and judicial reforms while simultaneously pointing out to the gargantuan failures of Dr Manmohan Singh's administration. Written between 2011 and 2013, these articles capture India's precipitous decline in various spheres caused by a singular lack of willingness and capacity to govern. In a refreshing departure from the known suspects who end up merely being critical of the Government, he also offers various alternatives to the challenges confronting the country. Needless to emphasize while his suggestions are eminently debatable, the fact remains that these proposals are sure to secure necessary traction in days to follow. The Toynbee-like sweep of the subjects dealt by Venkatesh in a precise, succinct and incisive manner makes this book a compelling read. The foreword of this book has been authored by Dr Subramanian Swamy.

**Tax Administration in Developing Countries** Mr. Charles Y. Mansfield, 1987-06-01 This paper examines the role of tax administration in developing countries from an economic perspective. The traditional separation of tax policy and tax administration in the literature is shown to break down in developing countries where tax administrators decide in what manner complicated tax legislation should actually be applied. After surveying economic literature dealing with tax administration, the paper offers guidelines on how tax administrators can help implement more efficient and equitable tax systems.

Emmanuel Saez,1999 This paper uses a panel of individual tax returns and the bracket creep as source of tax rate variation to construct instrumental variables estimates of the sensitivity of income to changes in tax rates From 1979 to 1981 the US income tax schedule was fixed in nominal terms while inflation was high around 10% This produced a real change in tax rate schedules Taxpayers near the top end of a tax bracket were more likely to creep to a higher bracket and thus experience a rise in marginal rates the following year than the other taxpayers Compensated elasticities can be estimated by comparing the differences in changes in income between taxpayers close to the top end of a tax bracket to the other taxpayers These estimates based on comparisons between very similar groups are robust to underlying changes in the income distribution such as a rise in inequality The elasticities found are higher than those derived in labor supply studies but smaller than those found previously with the same kind of tax returns data
