Readers who will benefit from this comprehensive overview of the latest in information technology include students, researchers, and industry professionals in the fields of cloud computing, internet of things, machine learning, information security, multimedia systems, information

technology and so on The book also serves as a comprehensive overview for young investigators looking to start a new research program **Advances in Artificial Intelligence Research** Beata Zielosko, Rafał Doroz, Ireneusz Czarnowski, Janusz Kacprzyk, Jacek Mańdziuk, 2026-01-01 This book is a collection of papers related to the latest achievements and development trends in the field of artificial intelligence. This compilation of peer reviewed articles presents both theoretical foundations and innovative algorithms as well as interdisciplinary applications that shape modern intelligent technologies. It serves as a platform for critical academic discussion integrating methodological foundations with the analysis of contemporary AI issues. This book points to many advances topically subdivided into parts related to data mining and machine learning, medical interdisciplinary and human behaviour applications, neural network and deep learning systems, computer vision, uncertainty in AI, robotics and autonomous systems, problem solving and optimisation, generative AI, decision making and classification in complex systems and research of young scientist in field of AI. By addressing innovative approaches, implementation, efficiency and responsibility in applications, this book is a valuable source of knowledge for researchers, practitioners and students in technical disciplines.

Artificial Intelligence for Urban Planning Thomas W. Sanchez, 2025-09-22 This book aims to introduce planners to AI, outlining essential concepts, terminologies, and methodologies. AI now promises to reshape urban planning but as with many technological innovations, AI also introduces ethical, practical, and organizational challenges. Understanding both AI's current capabilities and its limitations is essential for planners even as we acknowledge the rapid and unpredictable nature of its evolution. Chapters address some of these complexities not by providing definitive answers but by introducing urban planners to core AI topics. The book shows how planners can effectively use AI in their daily practices, engage constructively with technical specialists, and critically assess the appropriateness of these technologies in different planning contexts. This book will be of interest to both urban planning professionals and researchers.
