College Rankings Guide Open Now:

Tuition Rising Ronald G. Ehrenberg, 2009-07-01 America's colleges and universities are the best in the world. They are also the most expensive. Tuition has risen faster than the rate of inflation for the past thirty years. There is no indication that this trend will abate. Ronald G. Ehrenberg explores the causes of this tuition inflation, drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University. Using incidents and examples from his own experience, he discusses a wide range of topics including endowment policies, admissions and financial aid policies, the funding of research, tenure and the end of mandatory retirement, information technology, libraries and distance learning, student housing and intercollegiate athletics. He shows that colleges and universities having multiple, relatively independent constituencies suffer from ineffective central control of their costs. And in a fascinating analysis of their response to the ratings published by magazines such as U.S. News World Report, he shows how they engage in a dysfunctional competition for students. In the short run, colleges and universities have little need to worry about rising tuitions, since the number of qualified students applying for entrance is rising even faster. But in the long run, it is not at all clear that the increases can be sustained. Ehrenberg concludes by proposing a set of policies to slow the institutions' rising tuitions without damaging their quality.

Greenes' Guides to Educational Planning: Making It Into a Top College Howard Greene, Matthew W. Greene, 2000-07-25 Presents a ten step plan for getting accepted to a selective college in the U.S. covering how to learn about admissions requirements, prepare academically, use the application and the interview, and handle financial matters, along with several other topics. Also includes specific strategies for international students.

The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced, followed by discussion of major issues and perspectives consumer use of the publications, validity of ratings and the institutional burden of supplying the needed
