### **Blockchain-enabled Fog and Edge Computing: Concepts, Architectures and Applications** Muhammad Maaz

Rehan, Mubashir Husain Rehmani, 2020-07-27 This comprehensive book unveils the working relationship of blockchain and the fog edge computing. The contents of the book have been designed in such a way that the reader will not only understand blockchain and fog edge computing but will also understand their co-existence and their collaborative power to solve a range of versatile problems. The first part of the book covers fundamental concepts and the applications of blockchain enabled fog and edge computing. These include Internet of Things, Tactile Internet, Smart City, and E-challan in the Internet of Vehicles. The second part of the book covers security and privacy related issues of blockchain enabled fog and edge computing. These include hardware primitive based Physical Unclonable Functions, Secure Management Systems, security of Edge and Cloud in the presence of blockchain, secure storage in fog using blockchain, and using differential privacy for edge based Smart Grid over blockchain. This book is written for students, computer scientists, researchers, and developers who wish to work in the domain of blockchain and fog edge computing. One of the unique features of this book is highlighting the issues, challenges, and future research directions associated with Blockchain enabled fog and edge computing paradigm. We hope the readers will consider this book a valuable addition in the domain of Blockchain and fog edge computing.

### *Digital Data Collection and Information Privacy Law*

Mark Burdon, 2020-04-23 In *Digital Data Collection and Information Privacy Law*, Mark Burdon argues for the reformulation of information privacy law to regulate new power consequences of ubiquitous data collection. Examining developing business models based on collections of sensor data with a focus on the smart home, Burdon demonstrates the challenges that are arising for information privacy's control model and its application of principled protections of personal information exchange. By reformulating information privacy's primary role of individual control as an interrupter of modulated power, Burdon provides a foundation for future law reform and calls for stronger information privacy law protections. This book should be read by anyone interested in the role of privacy in a world of ubiquitous and pervasive data collection.
