So how can companies and nonprofit organizations turn sustainability strategies into real world practice? How can they innovate to gain a competitive edge while contributing to sustainable and regenerative development? And where should you as an innovation sustainability or human resource manager begin? In this first comprehensive work on sustainable innovation cultures, the authors Show how organizational culture translates sustainability related values into environmentally, socially and economically valuable outcomes. By aligning sustainability literacy with appropriate practices and mediating artefacts including those of artificial intelligence, virtuous circles of targeted output, valuable outcomes and desired impacts can be created. Three stages of activity are crucial if an organization is to grow a sustainable innovation culture: namely, conceiving, co-creating and cultivating. First, understand and specify the organization's values, tensions and values action gaps; then, co-create targeted interventions; and finally, cultivate sustainable innovation practices and methods. This framework and its practices and methods are based on a comprehensive literature review, expert interviews and ethnographic field studies in transformational companies across Europe with a global presence. Case studies and examples illustrate each of the 32 practices and 36 methods described in the book.
