Mishra, 2025-12-17 The current era of artificial intelligence and machine learning AIML tools has transformed the workings of vast swaths of our private working and social lives beyond recognition It has been found that these tools can solve many problems in better and faster ways compared to humans AIML tools allow machines and related systems to reason and infer almost like humans and this has deep intellectual and philosophical ramifications as well The areas of machine learning are broadly classified into supervised unsupervised and deep reinforcement learning DRL The last one comes closest to how humans reason and various innovations in this area have many useful applications This book covers most of the areas of DRL with a special focus on its mathematical and algorithmic foundations Undergraduate and early graduate students should find it to be a good guide to the fast developing areas of DRL and its myriad applications in both technical and social contexts **Explainable Artificial Intelligence for Trustworthy Decisions in Smart Applications** Nicu Bizon, Bhargav Appasani, 2025-09-30 This book introduces readers to the field of explainable artificial intelligence XAI which aims to make AI models more transparent and trustworthy It explores how XAI can enhance trust and confidence in AI models and their decisions across various innovative applications in fields such as healthcare finance and engineering where AI can significantly impact quality of life Readers will discover emerging trends related to XAI such as large language models generative AI and natural language processing that are transforming the landscape of AI research and applications Featuring an interdisciplinary overview the book examines the state of the art challenges and opportunities in XAI accompanied by clear examples and detailed explanations of its methods and techniques The book also offers a balanced perspective on the limitations and trade offs of XAI and outlines future directions and opportunities for both research and practice This book is intended for anyone who wants to learn more

about XAI and understand how it can enhance trust in AI models      Innovations in Teaching and Learning for Health Professions Educators Roger Edwards, Bobbie Ann Adair White, Ardi Findyartini, 2025-06-02 The health professions continue to evolve and change rapidly as more opportunities and challenges emerge. Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations. These innovations have included teaching with technologies like virtual reality, gamification, online applications, and artificial intelligence. Innovations also include know-how such as emotional intelligence and ways of approaching the learning process through student-centered learning experiences grounded in the cognitive science of learning. Scholarship related to identification of the best uses of different innovations is difficult. The same innovations have proven to be engaging in some contexts and burdensome in others. Additionally, simulation-based education continues to incorporate innovations in how health professions educators are taught, with more focus on effectiveness of the simulation educator, including applications with distance simulation. Training and development for health professions and simulation educators is becoming more formalized, yet gaps on effectiveness of training and development efforts persist. Faculty effectiveness, especially as it relates to educational innovation adoption, is difficult to measure and demonstration of related competencies is in its infancy. The goal of this Research Topic is to bring together state-of-the-art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation, which is broadly defined as an idea, practice, technology, and know-how. Evidence about the current state of emerging innovations, effectiveness of innovations, and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection. All types of scholarship can support this focus, including analyses based on primary quantitative and qualitative data collection, secondary data analyses, literature reviews, and methodological infrastructure tool development. Additionally, scholarship investigating how these innovations have influenced health professions educators, including their training and development, is part of the goal of the collection. The scope of this collection covers any innovations that are applicable to professional development and implementation for health professions educators. More specifically, we invite scholarship related to how educators prepare themselves for meeting the needs of their students, given the changing roles and innovations available to both faculty and students across learning environments worldwide. Examples of topics of interest include: Analyses of innovation related to the evolving roles of health professions educators; Reviews of educational innovation adoption by health professions education faculty, especially related to artificial intelligence-linked applications; Exploring factors associated with professional development training and effective educational innovation adoption by faculty; Simulation-based educational innovation applications for faculty development; Faculty innovation in resource-constrained environments in low and middle-income countries; Methodological challenges associated with studying educational innovations by faculty in health professions education; and critical research needs associated with generating and evaluating educational innovations. Methodological

considerations associated with health professions education faculty competencies Theoretically focused analyses are welcome as long as they are linked to applications

### **Establishing AI-Specific Cloud Computing Infrastructure**

Sharma, Avinash Kumar, Nitin, Kumar, Sumit, 2025-04-08 As artificial intelligence AI continues to drive innovation across industries the need for specialized cloud computing infrastructure to support AI workloads is critical Traditional cloud platforms often struggle to meet the high computational demands and storage requirements of AI models especially as they grow in complexity and scale Establishing AI specific cloud computing infrastructure involves designing systems optimized for the needs of AI such as powerful processing capabilities massive data storage and real time processing With advancements in hardware like graphics processing units and tensor processing units along with sophisticated data management solutions businesses can better harness the full potential of AI technologies This specialized infrastructure enhances the performance and scalability of AI applications while enabling faster innovation and more efficient deployment of AI driven solutions across sectors Establishing AI Specific Cloud Computing Infrastructure explores how AI has evolved as a transformative new technology capable of delivering large incremental value to a wide range of sectors It examines recent advances in innovation specifically how computing power data storage and digitized data have led to AI based applications for business and governance This book covers topics such as digital technology sustainable development and artificial intelligence and is a useful resource for computer engineers business owners academicians data scientists and researchers
