Sarea, Ahmed H. Elsayed, Saeed A. Bin-Nashwan, 2021-12-30 This book provides a systematic overview of the current trends in research relating to the use of artificial intelligence in Islamic financial institutions IFIs across all organization of Islamic cooperation OIC countries Artificial Intelligence and Islamic Finance discusses current and potential applications of artificial intelligence AI for risk management in Islamic finance It covers various techniques of risk management encompassing asset and liability management risk credit market operational liquidity

risk as well as regulatory and Shariah risk compliance within the financial industry. The authors highlight AI's ability to combat financial crime such as monitoring trader recklessness, anti-fraud and anti-money laundering and assert that the capacity of machine learning (ML) to examine large amounts of data allows for greater granular and profound analyses across a variety of Islamic financial products and services. The book concludes with practical limitations around data management, policies, transparency and lack of necessary skill sets within financial institutions. By adopting new methodological approaches steeped in an Islamic economic framework e.g. analysing FinTech in the context of Shariah principles and Islamic values, it devises practical solutions and generates insightful knowledge helping readers to understand and explore the role of technological enablers in the Islamic finance industry such as RegTech and artificial intelligence in providing better and Shariah compliant services to customers through digital platforms. The book will attract a wide readership spanning Shariah scholars, academicians and researchers as well as Islamic financial practitioners and policy makers.

**Recent Trends in Correspondent Banking Relationships** International Monetary Fund. Strategy, Policy, & Review Department, International Monetary Fund. Legal Dept., International Monetary Fund. Monetary and Capital Markets Department, 2017-04-21

Correspondent banking relationships (CBRs) which facilitate global trade and economic activity have been under pressure in several countries. So far cross border payments have remained stable and economic activity has been largely unaffected despite a recent slight decrease in the number of CBRs. However, in a limited number of countries financial fragilities have been accentuated as their cross border flows are concentrated through fewer CBRs or maintained through alternative arrangements. These fragilities could undermine affected countries long run growth and financial inclusion prospects by increasing costs of financial services and negatively affecting bank ratings.
