GPT attempted 10 programming contests 100 times each, but was unable to consistently find solutions to the complex problems.

GPT 4.0 has made impressive strides over GPT 3.5 but continues to struggle in certain subjects.

A percentile describes how an examinee's score ranks in comparison to others.

For example

60th Percentile

60% of examinees scored lower than ChatGPT

40% scored higher than ChatGPT

Chatgpt 2025

Sebastian angeloff

Chatgpt 2025:

The Human-Centered Classroom KHRITISH SWARGIARY, 2025-11-14 Education is standing at the edge of the greatest transformation in human history For centuries schools were designed like factories students entered as raw material were processed through standardized curricula and were expected to emerge as identical products ready for the workforce That model once served a world driven by industrial labor limited information and predictable career paths But today we live in an age of artificial intelligence global connectivity cultural diversity emotional crises and unprecedented technological acceleration The old system is no longer just outdated it is dangerously inadequate This book was born from a simple but urgent question What should education look like in a world where machines can think information is infinite and human beings are searching for meaning As an educator researcher and lifelong learner I have spent years working at the intersection of inclusive education educational technology and policy driven reform Through my engagement with students teachers parents researchers and institutions one reality has become painfully clear while technology is advancing rapidly our education systems are failing to keep pace with the human needs of learners Children are more connected than ever before yet emotionally more isolated Knowledge is everywhere yet understanding is rare Tools are powerful yet compassion and creativity are often neglected This book does not argue that technology is the problem On the contrary it recognizes artificial intelligence digital learning platforms and data driven education as some of the most powerful allies humanity has ever created What we must question however is how these tools are used and whether they are designed to serve human growth or simply economic efficiency When technology is introduced without empathy it deepens inequality When used without ethics it weakens trust But when aligned with human values it becomes a force for extraordinary transformation At the heart of this book lies a conviction The future of education must be human centered emotionally intelligent and radically inclusive Every child whether gifted or struggling disabled or neurodivergent wealthy or underprivileged deserves an education that recognizes their dignity potential and individuality For far too long education systems across the world have defined success by narrow standards of academic performance while ignoring emotional wellbeing creativity adaptability and purpose The result is a generation of students who may be skilled yet uncertain knowledgeable yet disconnected from themselves and the world This book calls for a new educational philosophy one that integrates artificial intelligence with emotional intelligence digital tools with ethical responsibility and innovation with inclusion It presents a vision of classrooms where technology does not replace teachers but empowers them where data supports learning but does not erase human judgment and where every learner regardless of ability or background is seen heard and supported I have written this book not merely as an academic contribution but as a deeply personal and professional commitment to the future of education It is meant for teachers seeking meaning beyond exams policymakers looking for sustainable reform researchers pursuing impact and students who deserve a learning experience that prepares them not only for jobs but for life The world our children will

inherit will be complex uncertain and technologically advanced But it must also be compassionate fair and deeply human Education is the bridge between those two realities If we build that bridge wisely we can ensure that artificial intelligence enhances human potential rather than diminishing it and that progress never comes at the cost of dignity This book invites you to imagine design and lead that future Khritish Swargiary Author AKA KS Luminar *Managing Artificial Intelligence* Nils Urbach, Daniel Feulner, 2026-01-01 Artificial intelligence AI is reshaping the way organizations operate make decisions and create value As AI systems become increasingly embedded in business processes the challenge lies not only in understanding the technology but in managing it effectively This book provides a comprehensive and structured overview of the principles strategies and practices required to integrate AI into modern organizations It spans the full AI lifecycle from foundational concepts and learning methods to the identification of use cases the implementation of AI strategies and governance mechanisms as well as the design and development of AI applications It examines how to design meaningful human AI interactions navigate workforce transformation and operate AI systems at scale Ethical legal and social dimensions are addressed to ensure that AI adoption aligns with values such as transparency fairness and accountability The book is written for decision makers professionals and students who are not only curious about AI but who want to actively shape its role in organizations Whether you re leading AI initiatives or preparing for the future of work it provides essential guidance for leveraging AI in a strategic and impactful way After all AI hasn t yet figured out how to manage itself **Artificial Intelligence in Business and Engineering** Günter Hofbauer, 2025-11-19 The use of artificial intelligence has focused mainly on knowledge driven industries so far However the true game changer was the application in the core operational fields of business and engineering Here AI unlocks immense efficiency and synergy potential up to and including the transformation of entire business and industry models This volume highlights today s practical applications and future perspectives of AI in industrial technologies It explores generative and emotional AI the impact on jobs and skills and uses in healthcare diagnostics and mobility illustrated by human machine interfaces recognition techniques and large language models Providing both strategic and operational guidance it equips professionals and executives not just to observe but to actively shape this epochal transformation **Succeeding with Your Master's Dissertation A Step-by-Step Handbook** BIGGAM, 2025-10-10 Biggam offers a clear rationale for why a dissertation is a standard part of many master s programmes and provides a user friendly approach to planning and writing large pieces of work His pragmatic advice and guidance on good practice will help students to keep on track with their dissertations and avoid common errors This new edition has been fully updated and includes useful advice on topics such as Generative AI and academic integrity The writing style is accessible and reassuring and the extensive content will be applicable to students across disciplines Donna Murray Head of Taught Student Development University of Edinburgh UK Do you want to ensure you are successful with your master s dissertation Then this book is for you Brimming with examples of good practice *Succeeding with Your Master s Dissertation*

offers clear straightforward and practical support for each stage of the master s dissertation from proposal to submission It features step by step guidance on how to clarify your research objectives produce a research proposal complete each chapter of a traditional dissertation reference sources and prepare for a viva In doing so it includes practical examples highlights common pitfalls that students need to avoid and offers advice on how to achieve high marks Now in its sixth edition this handbook features A brand new chapter on Generative AI More examples on how to critique literature using a structured approach New material on research ethics plagiarism innovative research methodologies and differences between types of dissertations This is essential reading for postgraduate dissertation students across disciplines John Biggam has taught extensively at university level published widely in academia and presented at prestigious global conferences Although now retired John gives guest lectures to share his extensive experience and expert knowledge on how to succeed with your dissertation

AI-Driven Sustainability Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-11-25 *AI Driven Sustainability The Future of Human Resources Management* is an interdisciplinary publication that demonstrates the artificial intelligence phenomenon or AI in the sustainable shaping of human resources management The role of AI as a support to the existing HR processes and a comprehensive changer of organizational ethical social and environmental values is reviewed by authors By providing readers with the wide scale of explanatory case studies among global business corporations and with a thorough review of law ethical and technological issues in 10 chapters the book suggests a green model of AI implementation in HR dimensions A must read publication for researchers practitioners and leaders who want to make their business part of the conscious future in labor in the environment of digitalization

Medical Device Management Andreas Krämer, Cosimo Franco, Fabiola Hartung-Linz, Ellen Thom, 2025-12-02 Medical Devices are an extremely important versatile and complex product category within healthcare However compared to medicinal products hospitals medical staff etc there is much less general awareness and understanding of medical devices This book illuminates different facets of medical devices in a holistic manner It describes the complexity of the industry markets manufacturers and numerous other stakeholders as well as related regulations required competencies and future trends More specifically it describes a range of products and innovations safety risks and regulations legal aspects and certification processes It also examines the market from the point of view of the manufacturer from start ups to large companies and conglomerates Finally this book looks at the special role sustainability and ESG plays in the future of medical device innovation production and usage Featuring industry case studies this book is ideal for individuals from scientists to managers interested in healthcare and who would like to understand the overall relevance of medical devices from different perspectives specifically interactions developments and dynamics between the different business areas and stakeholders This book is open access
