*Mobile Displays* Achintya K. Bhowmik, Zili Li, Philip J. Bos, 2008-06-09

The mobile display industry has witnessed rapid growth in both volume and diversification in recent years. This trend is expected to persist with continued consumer demand for mobile communications and computing applications. Mobile displays are now integral to a wide range of devices such as MP3 players, digital cameras, PDAs, GPS map readers, portable DVD players, and electronic books as well as the ubiquitous mobile phone and laptop computers. This proliferation of products has fuelled a significant investment into the research and development of the mobile display with key research laboratories across the display industry and academia producing many exciting technological advancements. With contributions from well known experts in both industry and academia this book presents a comprehensive coverage of the mobile display in a single volume. Ranging from an in depth analysis of the requirements that the displays must meet through current devices to emerging technologies the text features mobile environment and human factor considerations for the display advances in the incumbent active matrix liquid crystal display (AMLCD) technologies, backlighting and light manipulation techniques, mobile display driver electronics and interface technologies, emerging technologies including active matrix organic light emitting diode (AMOLED) electronic paper displays and system on glass (SOG) developments, application developments in eyewear, mobile projector and 3D displays. *Mobile Displays: Technology and Applications* presents in addition to the fundamentals a detailed update on state of the art advancements. It is an invaluable resource for practicing electronics and display engineers working on the development of mobile displays and their applications. It is also an extensive reference for graduates taking special courses in display technologies. The Society for Information Display (SID) is an international society which has the aim of encouraging the development of all aspects of the field of information display. Complementary to

the aims of the society the Wiley SID series is intended to explain the latest developments in information display technology at a professional level The broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics
