Sculpting Time: The Daily Rituals Of Great Artists And Thinkers (Refine and Edited) BD Sharma, 101-01-01 Sculpting Time reveals the daily routines and rituals that have helped some of history's most influential artists, thinkers and creators achieve greatness. From early morning rituals to late night creative bursts, this book explores how structure and discipline shape the creative process. By examining the daily habits of geniuses like Picasso, Beethoven and Einstein, readers will gain insight into how discipline can nurture creativity. The book emphasizes the importance of consistency and how small daily actions such as meditation, exercise and journaling can have a profound impact on the quality and quantity of your creative output. If you're looking for inspiration to cultivate your own routine or to boost your productivity and creativity, this book offers practical tips and timeless wisdom from the masters.

Resources in Education, 1979 **Science Literacy in Primary Schools and Pre-Schools** Haim Eshach, 2006-08-12 Science is more than a compilation of facts and figures, although one would not know that from observing classroom lessons in science in elementary schools in many parts of the world. In fact, there are those who argue that science is not appropriate subject content for the early grades of elementary school. There are many schools in which science is simply not present in the earliest grades. Even where science is taught in the earliest grades, it is often a caricature of science that is presented to the children. This book offers a vigorous, reasoned argument against the perspective that science doesn't belong in the early grades. It goes beyond that, in offering a view of science that is both appropriate to the early grades and faithful to the nature of the scientific enterprise. Dr. Eshach is not a voice in the chorus that claims young children's developmental lack of readiness for such study. He believes, as do I, that in order to learn science, one must do science. At the heart of the doing of science is the act of exploration and theory formation. To do science, we must explore the ways in which the world around us looks, sounds, smells, feels and behaves.

Hands-On Earth Science Activities For Grades K-6 Marvin N. Tolman, 2006-03-24 With more than 150 exciting hands-on activities to teach students thinking and reasoning skills and basic science concepts and facts, this book is the perfect complement to any elementary school science program. Activities in the Earth Science volume cover air, water, weather, earth, ecology, gravity and flight and celestial bodies. The updated editions include an expanded teacher information section for all of the activities, enhanced user-friendliness, inquiry-based models and cooperative learning projects for the classroom. Projects use materials easily found around the classroom or home, provide science fair ideas at the end of each section, link activities to national science standards and include other new material.
