## **Tax Bracket Ideas Setup:**

IMF Staff papers, Volume 45 No. 1 International Monetary Fund. Research Dept., 1998-01-01 This paper analyzes some leading indicators of currency crises and proposes a specific early warning system. This system involves monitoring the evolution of several indicators that tend to exhibit an unusual behavior in the periods preceding a crisis. When an indicator exceeds a certain threshold value this is interpreted as a warning signal that a currency crisis may take place. The variables that have the best track record within this approach include exports, deviations of the real exchange rate from trend and the ratio of broad money to gross international reserves, output and equity prices. **Topics in Public Economics** David Pines, Efraim Sadka, Itzhak Zilcha, 1998 The evolving modern world is characterized by two opposing trends integration and segregation. On the one hand we witness strong forces for segregation on the basis of nationality, ethnicity, religion and culture in the former Soviet Union, the former Czechoslovakia, the former Yugoslavia as well as in Northern Ireland, Spain and Canada. These forces are quite strong and in some cases violent. On the other hand the European Union and NAFTA represent the tendency for integration motivated primarily by economic considerations such as gains from trade and scale economies. In fact these opposing trends can be explained by the concepts developed in modern club theory, local public finance and international trade.

*Highway Topics*, 1928 The Effects of Taxation on Multinational Corporations Martin Feldstein, James R. Hines, Jr., R. Glenn Hubbard, 2007-12-01 The tax rules of the United States and other countries have intended and unintended effects on the operations of multinational corporations, influencing everything from the formation and allocation of capital to competitive strategies. The growing importance of international business has led economists to reconsider whether current systems of taxing international income are viable in a world of significant capital market integration and global commercial competition. In an attempt to quantify the effect of tax policy on international investment choices, this volume presents in-depth analyses of the interaction of international tax rules and the investment decisions of multinational enterprises. Ten papers assess the role played by multinational firms and their investment in the U.S. economy and the design of international tax rules for multinational investment. Analyze channels through which international tax rules affect the costs of international business activities and examine ways in which international tax rules affect financing decisions of multinational firms. As a group the papers demonstrate that international tax rules have significant effects on firms' investment and other financing decisions.
