Chapter One, 1987 **Digital Technology for Humans** Robert Hanna, 2025-06-02. Digital ethics and AI ethics are of fundamental importance for humankind and its future. Hanna shows how specifically Kantian moral principles can be applied to the design, production, and implementation of digital technology with a special focus on how these principles flow from the concept and fact of human dignity. His core thesis is that digital technology is nothing more and nothing less than a tool created by humankind for the betterment of humankind, whose use should be constrained by Kantian moral principles grounded in human dignity. This thesis promises to stimulate new research on Kantian approaches to digital ethics and AI ethics. It also has important political implications, including a clarion call for us to engage in the self-conscious, self-disciplined, and free exercise of our own innate cognitive, affective, and practical capacities in the face of new and exceptionally powerful forms of digital technology, e.g., chatbots that threaten to undermine our ability to think, feel, and act for ourselves.
