## **The Maritime Transport Crisis World Bank Discussion Paper:**

The Maritime Transport Crisis Hans Jürgen Peters, 1993-01-01 Effective planning and management of urban infrastructure is essential to improving the standard of living in rapidly developing urban areas Deterioration or cessation of services can create health risks limit economic productivity damage public and private property and lead to congestion in transport and communications But effective infrastructure services are impossible without adequate records and maps of municipal facilities particularly those underground The authors review recent developments in the recording and mapping of urban infrastructure The paper identifies the institutional organizational and technological issues involved and explores some strategic options for addressing these pressing issues The options discussed include how best to determine the proper institutional structure develop human resources and make the best use of technology The authors perceive an urgent need for development of legal frameworks to make recordkeeping more comprehensive and compatible among various utilities localities and governmental bodies They advise that immediate attention be given to a particular organizational issue in many utilities no one department is responsible for collecting and processing data and even when such responsibility is designated the methods to be used are unclear or the resources are inadequate The paper offers case studies and concludes that improvements in utility mapping and recordkeeping are cost effective enhance the efficiency of the utility and improve the overall quality of urban life The World Bank Research Program 1994 ,1994 *World Bank Research Program* World Bank, 1994 **Sustainable Transport** ,1996-01-01 This publication elaborates on how the specific characteristics of the different transport subsectors affect the potential for expanding the role of competitive markets It defines the principal challenges currently faced by the transport sector as a whole as i the completion of basic infrastructure networks and ii the provision of adequate maintenance for them Future challenges may include i increasing responsiveness to customer needs ii adjusting to global trade patterns and iii coping with rapid motorization These challenges highlight the need to reform institutional and transport policy in order to support a better quality of life on a sustained basis This book identifies some generally applicable principles and best practices as the foundation of a policy for more sustainable transport Economic and financial sustainability requires that resources be used efficiently and that assets be maintained properly Environmental and ecological sustainability requires that the external effects of transport be taken into account fully when public or private decisions are made that determine future development Social sustainability requires that the benefits of improved transport reach all sections of the community It is necessary to redefine the role of governments in the transport sector the focus in transport policy must shift toward a market based approach with the private sector taking on more of the responsibility for providing operating and financing transport services and infrastructure The role of the government would therefore decline but its importance as the enabler of competition and the custodian of environmental and social interests would increase The World Bank Group s role will be to focus on institutional and policy reform it can help governments fulfill their enabling and

supervisory role in a freer transport market through more selective and focused technical assistance for building the capacity and skills needed by the public sector Website Integration of Transport and Trade Facilitation T. R.
