Meares, 1997 **The Play Pictorial**, 1911 **The Ambiguity of Play** Brian Sutton-Smith, 2009-06-30 Every child knows what it means to play but the rest of us can merely speculate Is it a kind of adaptation teaching us skills inducting us into certain communities Is it power pursued in games of prowess Fate deployed in games of chance Daydreaming enacted in art Or is it just frivolity Brian Sutton Smith a leading proponent of play theory considers each possibility as it has been proposed elaborated and debated in disciplines from biology psychology and education to metaphysics mathematics and sociology Sutton Smith focuses on play theories rooted in seven distinct rhetorics the ancient discourses of Fate Power Communal Identity and Frivolity and the modern discourses of Progress the Imaginary and the Self In a sweeping analysis that moves from the question of play in child development to the implications of play for the Western work ethic he explores the values historical sources and interests that have dictated the terms and forms of play put forth in each discourse s objective theory This work reveals more distinctions and disjunctions than affinities with one striking exception however different their descriptions and interpretations of play each rhetoric reveals a quirkiness redundancy and flexibility In light of this Sutton Smith suggests that play might provide a model of the variability that allows for natural selection As a form of mental feedback play might nullify the rigidity that sets in after successful adaption thus reinforcing animal and human variability Further he shows how these discourses despite their differences might offer the components for a new social science of play *Literary Silences in Pascal, Rousseau, and Beckett* Elisabeth Marie Loevlie, 2003 To explore literary silence is to explore the relationships between literary texts and the silence of the ineffable It is to enquire what dynamics texts develop as they strive to say the unsayable and it is to think literature as a silence that speaks itself This study describes these literary and silent dynamics through readings of Pascal s Pens es Rousseau s R veries and Beckett s trilogy Molloy Malone meurt and L Innommable It contributes to our understanding of three major writers and challenges our idea of what silence is The subject of silence and of the ineffable has a long philosophical and critical tradition A careful study of this tradition reveals the dominance of a limiting dualistic understanding of silence and its relationship to noise or language silence becomes the negative other the

beyond about which there remains nothing to say The study of literary silence seeks rather to trace a language that becomes its own silence It compromises the attempt to think a silence that moves within and through texts that is inherent to the literary expression Central to this theoretical endeavour are thinkers like Derrida Deleuze Gadamer and Vattimo among several others The theoretical understanding of silence permits an effective methodology for reading literary silence Notions of repetition the aporia and the implosion which are developed in reference to Kierkegaard and Bataille describe textual strategies of literary silence and structure the readings Finally the reading of literary silence has its point of reference in writers like Mallarm Blanchot and Beckett It is their texts that have taught us to become topological readers to move in and out of texts movements they have shown us how the literary expression is irreducible to linear meaning oriented language As readers of such texts we have been prepared to read the dynamics of the unsayable and finally to start discerning the silences of the literary
