The Modern Invention Of Information Discourse History And Power:

The Modern Invention of Information Ronald E Day,2008-02-20 In The Modern Invention of Information Discourse History and Power Ronald E Day provides a historically informed critical analysis of the concept and politics of information Analyzing texts in Europe and the United States his critical reading method goes beyond traditional historiographical readings of communication and information by engaging specific historical texts in terms of their attempts to construct and reshape history After laying the groundwork and justifying his method of close reading for this study Day examines the texts of two pre World War II documentalists Paul Otlet and Suzanne Briet Through the work of Otlet and Briet Day shows how documentation and information were associated with concepts of cultural progress Day also discusses the social expansion of the conduit metaphor in the works of Warren Weaver and Norbert Wiener He then shows how the work of contemporary French multimedia theorist Pierre L vy refracts the earlier philosophical writings of Gilles Deleuze and F lix Guattari through the prism of the capitalist understanding of the virtual society Turning back to the pre World War II period Day examines two critics of the information society Martin Heidegger and Walter Benjamin He explains Heidegger s philosophical critique of the information culture s model of language and truth as well as Benjamin s aesthetic and historical critique of mass information and communication Day concludes by contemplating the relation of critical theory and information particularly in regard to the information culture s transformation of history historiography and historicity into positive categories of assumed and represented knowledge   *Annual Review of Information Science and Technology* Information Today Inc,2005-10 ARIST published annually since 1966 is a landmark publication within the information science community It surveys the landscape of information science and technology providing an analytical authoritative and accessible overview of recent trends and significant developments The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives While ARIST continues to cover key topics associated with classical information science e g bibliometrics information retrieval editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities Contents of Volume 40 2006 SECTION I Information and Society Chapter 1 The Micro and Macroeconomics of Information Sandra Braman Chapter 2 The Geographies of the Internet Matthew Zook Chapter 3 Open Access M Carl Drott SECTION II Technologies and Systems Chapter 4 TREC An Overview Donna K Harman and Ellen M Voorhees Chapter 5 Semantic Relations in Information Science Christopher S G Khoo and Jin Cheon Na Chapter 6 Intelligence and Security Informatics Hsinchun Chen and Jennifer Xu SECTION III Information Needs and Use Chapter 7 Information Behavior Donald O Case Chapter 8 Collaborative Information Seeking and Retrieval Jonathan Foster Chapter 9 Information Failures in Health Care Anu MacIntosh Murray and Chun Wei Choo Chapter 10 Workplace Studies and Technological Change Angela Cora Garcia Mark E Dawes Mary Lou Kohne Felicia Miller and Stephan F Groschwitz SECTION IV Theoretical Perspectives Chapter 11 Information History Alistair

Cortada,2025-01-02 This is the third and final volume in a broad study about the role of information largely in the Unites States since the early nineteenth century This book summarizes how information changed since the early 1800s what it looks like today including how it is being influenced by such current circumstances as the role of Big Data artificial intelligence misinformation on the Internet and the automation of decision making by computers using digital and analog information It is designed to be read by scholars in multiple disciplines and by the general public It is the byproduct of 30 years of studying the modern role of information The book includes a broad curated bibliographic essay about the broad subject of modern information   Birth of Modern Facts James W. Cortada,2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada s prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021   **The Early Information Society** Alistair Black,Dave Muddiman,2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In The Early Information Society the authors argue for an earlier incarnation of the information age focusing upon the period 1900 1960 In support of this they examine the history and traditions in Britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development The Early Information Society offers an historical account which questions the novelty of the current information society It will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society   Marcuse's Challenge to Education Douglas Kellner,Tyson Lewis,Clayton Pierce,Daniel K.
