## **The Moving City Processions Passages And Promenades In Ancient Rome:**

**The Moving City** Ida Ostenberg, Simon Malmberg, Jonas Bjørnebye, 2015-08-27 The Moving City Processions Passages and Promenades in Ancient Rome focusses on movements in the ancient city of Rome exploring the interaction between people and monuments Representing a novel approach to the Roman cityscape and culture and reflecting the shift away from the traditional study of single monuments into broader analyses of context and space the volume reveals both how movement adds to our understanding of ancient society and how the movement of people and goods shaped urban development Covering a wide range of people places sources and times the volume includes a survey of Republican imperial and late antique movement triumphal processions of conquering generals seditious violent movement of riots and rebellion religious processions and rituals and the everyday movements of individual strolls or household errands By way of its longue dur e dense location and the variety of available sources the city of ancient Rome offers a unique possibility to study movements as expressions of power ritual writing communication mentalities trade and also as a result of a massed populace violent outbreaks and attempts to keep order The emerging picture is of a bustling lively society where cityscape and movements are closely interactive and entwined *Performance, Memory, and Processions in Ancient Rome* Jacob A. Latham, 2016-08-16 The pompa circensis was a political pageant and a religious ritual that produced a republican imperial and even Christian image of the city In this book Jacob A Latham explores the play between performance and itinerary tracing the transformations of the circus procession from the late Republic to late antiquity *Urban Space and Aristocratic Power in Late Antique Rome* Carlos Machado, 2019-10-17 Between 270 and 535 AD the city of Rome experienced dramatic changes The once glorious imperial capital was transformed into the much humbler centre of western Christendom in a process that redefined its political importance size and identity Urban Space and Aristocratic Power in Late Antique Rome examines these transformations by focusing on the city s powerful elite the senatorial aristocracy and exploring their involvement in a process of urban change that would mark the end of the ancient world and the birth of the Middle Ages in the eyes of contemporaries and modern scholars It argues that the late antique history of Rome cannot be described as merely a product of decline instead it was a product of the dynamic social and cultural forces that made the city relevant at a time of unprecedented historical changes Combining the city s unique literary epigraphic and archaeological record the volume offers a detailed examination of aspects of city life as diverse as its administration public building rituals housing and religious life to show how the late Roman aristocracy gave a new shape and meaning to urban space identifying itself with the largest city in the Mediterranean world to an extent unparalleled since the end of the Republican period

Archaeoastronomy in the Roman World Giulio Magli, Antonio César González-García, Juan Belmonte Aviles, Elio Antonello, 2019-03-27 This book explores the insights that Cultural Astronomy provides into the classical Roman world by unveiling the ways in which the Romans made use of their knowledge concerning the heavens and by shedding new light on

the interactions between astronomy and heritage in ancient Roman culture Leading experts in the field present fascinating information on how and why the Romans referred to the sky when deciding upon the orientation of particular monuments temples tombs and even urban layouts Attention is also devoted to questions of broader interest such as the contribution that religious interpretation of the sky made in the assimilation of conquered peoples When one considers astronomy in the Roman world it is customary to think of the work and models of Ptolemy and perhaps the Julian calendar or even the sighting of the Star of Bethlehem However like many other peoples in antiquity the Romans interacted with the heavens in deeper ways that exerted a profound influence on their culture This book highlights the need to take this complexity into account in various areas of research and will appeal to all those who wish to learn more about the application of astronomy in the lives and architecture of the Romans

**Ancient Memory** Katharine Mawford,Eleni Ntanou,2021-07-05 Although the recent memory boom has led to increasing interdisciplinary interest there is a significant gap relating to the examination of this topic in Classics In particular there is need for a systematic exploration of ancient memory and its use as a critical and methodological tool for delving into ancient literature The present volume provides just such an approach theorising the use and role of memory in Graeco Roman thought and literature and building on the background of memory studies The volume s contributors apply theoretical models such as memoryscapes civic and cultural memory and memory loss to a range of authors from Homeric epic to Senecan drama and from historiography to Cicero s recollections of performances The chapters are divided into four sections according to the main perspective taken These are 1 the Mechanics of Memory 2 Collective memory 3 Female Memory and 4 Oblivion This modern approach to ancient memory will be useful for scholars working across the range of Greek and Roman literature as well as for students and a broader interdisciplinary audience interested in the intersection of memory studies and Classics

**Triumphs in**

**the Age of Civil War** Carsten Hjort Lange, 2016-08-11 Many of the wars of the Late Republic were largely civil conflicts. There was therefore a tension between the traditional expectation that triumphs should be celebrated for victories over foreign enemies and the need of the great commanders to give full expression to their prestige and charisma and to legitimize their power. *Triumphs in the Age of Civil War* rethinks the nature and the character of the phenomenon of civil war during the Late Republic. At the same time it focuses on a key feature of the Roman socio-political order: the triumph, and argues that a commander could in practice expect to triumph after a civil war victory if it could also be represented as being over a foreign enemy even if the principal opponent was clearly Roman. Significantly, the civil aspect of the war did not have to be denied. Carsten Hjort Lange provides the first study to consider the Roman triumph during the age of civil war and argues that the idea of civil war as normal reflects the way civil war permeated the politics and society of the Late Roman Republic.

**Studi italiani di filologia classica**, 2018 *Performance, Memory, and Processions in Ancient Rome* Jacob A. Latham, 2016 Jacob A. Latham explores the play between performance and itinerary tracing the transformations of the circus procession through Rome's history.

**The Ritual Construction of Rome** Jacob Abraham Latham, 2007 The ancient Mediterranean was a world of processions. This thesis, which examines the procession as a ritual form and outlines a history of processions at Rome, explores the capacity of processional practice to produce an image of the city by which it could be understood. Processions wove together spaces and institutions, monuments and people, fashioning an image of the city, its civic institutions and urban itineraries, which served to order knowledge and organize activity. In short, the processional image mapped the city socially and topographically from which a spectator could glean her place in Rome in the imagination and on the ground.

**Staging the World** Ida Ostenberg, 2009-05-21 *Staging the World* is an illustrated study of the Roman triumphal procession in its capacity as spectacle and performance. Ida Ostenberg analyses how Rome presented and perceived the defeated on parade. Spoils, captives and representations are the objects, and the basic questions to be asked concern both contents and context: What was displayed? How was it paraded? What was the response? The triumph was a crowded civic celebration when spectators met with coins from Spain and Asia, Jewish temple treasures, silver plate and furniture from opulent royal feasts, trees from eastern gardens, Punic elephants appearing as in battle, kings long known by name only, and ferocious barbarians dressed in outlandish costumes. Ostenberg aims to show what stories the Roman triumph told about the defeated and what ideas it transmitted about Rome itself.

*Walking Tours of Ancient Rome: A Secular Guidebook to the Eternal City (Mercury Guides)* Gary M. Devore, 2008-04-12 This guidebook is designed for tourists and scholars who are interested in exploring first-hand the grandeur and magnificence that was ancient Rome through a Humanist, secular and freethinking lens. Twelve walking tours are designed around districts of the city. Two appendices also describe day trips that are possible from the city center: the ruins of Rome's port city of Ostia and the remains of the emperor Hadrian's splendid villa at Tivoli.

**Walking in Roman Culture** Timothy M. O'Sullivan, 2011-07-14 Walking served as an occasion for the display of power and status in ancient Rome where great men paraded with their entourages through city streets and elite villa owners strolled with friends in private colonnades and gardens In this book length treatment of the culture of walking in ancient Rome Timothy O Sullivan explores the careful attention which Romans paid to the way they moved through their society He employs a wide range of literary artistic and architectural evidence to reveal the crucial role that walking played in the performance of social status the discourse of the body and the representation of space By examining how Roman authors depict walking this book sheds new light on the Romans themselves not only how they perceived themselves and their experience of the world but also how they drew distinctions between work and play mind and body and Republic and Empire

**Summary of Philip Matyszak's 24 Hours in Ancient Rome** Everest Media, 2022-06-22T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 This book takes us through one day in the life of Hadrian s Rome with the city seen from the different perspectives of twenty four of its inhabitants The people are the city the buildings and monuments that tourists admire are secondary important only as the physical echo of the people who built and lived among them 2 The city of Rome was more than just a collection of buildings and a society of interlocked communities It was an attitude and an entrepreneurial spirit that allowed the Romans to believe that no matter how bad things were they could always be better 3 The Roman fire department the Vigiles had a special duty to maintain law and order on the streets after dark but their main function was fire prevention The city was divided into seven districts for fire prevention purposes and Brevis and his colleagues were well aware that it was in the district they covered that the worst fire in Roman history began 4 The Roman watch has the power to break into any premises where they suspect a fire might get out of control They are not above handing out some basic physical chastisement and they have long established protocols for attacking the fire
