

HISTORY OF MUSIC.

MUSIC IN THE PREHISTORY AND ANCIENT TIMES:

It is probable that the first musical instrument was the human voice, whistles, clapping hands, making noises with sticks... In 2008 archaeologists discovered a bone flute in a cave in Germany. It is considered to be about 35,000 years old. The five-holed flute was made from a vulture wing bone.

MUSIC IN GREECE:

In Greece, music was an important part of ancient Greek theatre. Their choruses sang for entertainment, celebration and spiritual reasons. There were wind and string instruments like the lyre and kithara. Music was an important part of education in ancient Greece, and boys studied music starting at age of six.

Musicians in the Middle Ages

MEDIEVAL MUSIC:

The most important written repertory of music was religious music of the Roman Catholic Church, the largest part of it is called 'Gregorian chant'. Pope Gregory I gave his name to this musical repertory, written in latin and sang in churches.

Much of the surviving music of that time are special songs from troubadours like ballades (narrative poems or songs about medieval adventures and romances). Troubadours also played different instruments.

Music in the Renaissance

MUSIC IN RENNAISANCE:

It was born in northern Europe (north of France, the Netherlands and Belgium). By the middle of the 15th century, composers and singers spreaded this music across Europe, specially into Italy. This music was listened in churches, palaces, castles, villages...

The invention of printing press had an immense influence on the dissemination of musical styles. The most famous type of composition was 'the madrigal'.

The Music History Classroom:

The Music History Classroom James A. Davis, 2016-02-17 The Music History Classroom brings together essays written by recognized and experienced teachers to assist in the design implementation and revision of college level music history courses. This includes the traditional music history survey for music majors but the materials presented here are applicable to other music history courses for music majors and general education students alike including period classes, composer or repertory courses and special topics classes and seminars. The authors bring current thought on the scholarship of teaching and learning together with practical experience into the unique environment of the music history classroom. While many of the issues confronting teachers in other disciplines are pertinent to music history classes this collection addresses the unique nature of musical materials and the challenges involved in negotiating between historical information, complex technical musical issues and the aesthetics of performing and listening. This single volume provides a systematic outline of practical teaching advice on all facets of music history pedagogy including course design, classroom technology, listening and writing assignments and more. The Music History Classroom presents the nuts and bolts of teaching music history suitable for graduate students, junior faculty and seasoned teachers alike.

Navigating Stylistic Boundaries in the Music History Classroom Esther M. Morgan-Ellis, 2024-04-30 At a time of transformation in the music history classroom and amid increasing calls to teach a global music history, Navigating Stylistic Boundaries in the Music History Classroom adds nuance to the teaching of varied musical traditions by examining the places where they intersect and the issues of musical exchange and appropriation that these intersections raise. Troubling traditional boundaries of genre and style this collection of essays helps instructors to denaturalize the framework of Western art music and invite students to engage with other traditions vernacular, popular and non-Western on their own terms. The

book draws together contributions by a wide range of active scholars and educators to investigate the teaching of music history around cases of stylistic borders exploring the places where different practices of music and values intersect Each chapter in this collection considers a specific case in which an artist or community engages in what might be termed musical crossover exchange or appropriation and delves deeper into these concepts to explore questions of how musical meaning changes in moving across worlds of practice Addressing works that are already widely taught but presenting new ways to understand and interpret them this volume enables instructors to enrich the perspectives on music history that they present and to take on the challenge of teaching a more global music history without flattening the differences between traditions

Teaching Music History with Cases Sara Haefeli,2022-11-22 Teaching Music History with Cases introduces a pedagogical approach to music history instruction in university coursework What constitutes a music historical case How do we use them in the classroom In business and the hard sciences cases are problems that need solutions In a field like music history a case is not always a problem but often an exploration of a context or concept that inspires deep inquiry Such cases are narratives of rich complex moments in music history that inspire questions of similar or related moments This book guides instructors through the process of designing a curriculum based on case studies finding and writing case studies and guiding class discussions of cases

Race and Gender in the Western Music History Survey Horace J. Maxile, Jr.,Kristen M. Turner,2022-06-22 Race and Gender in the Western Music History Survey A Teacher s Guide provides concrete information and approaches that will help instructors include women and people of color in the typical music history survey course and the foundational music theory classes This book provides a reconceptualization of the principles that shape the decisions instructors should make when crafting the syllabus It offers new perspectives on canonical composers and pieces that take into account musical cultural and social contexts where women and people of color are present Secondly it suggests new topics of study and pieces by composers whose work fits into a more inclusive narrative of music history A thematic approach parallels the traditional chronological sequencing in Western music history classes Three themes include people and communities that suffer from various kinds of exclusion Locales Forms Responses Reception Each theme is designed to uncover a different cultural facet that is often minimized in traditional music history classrooms but which if explored lead to topics in which other perspectives and people can be included organically in the curriculum while not excluding canonical composers

Teaching Music History Mary Natvig,2017-07-05 Unlike their colleagues in music theory and music education teachers of music history have tended not to commit their pedagogical ideas to print This collection of essays seeks to help redress the balance providing advice and guidance to those who teach a college level music history or music appreciation course be they a graduate student setting out on their teaching career or a seasoned professor having to teach outside his or her speciality Divided into four sections the book covers the basic music history survey usually taken by music majors music appreciation and introductory courses aimed at non majors special topic courses such as women and music

music for film and American music and more general issues such as writing using anthologies and approaches to teaching in various situations In addition to these specific areas broader themes emerge across the essays These include how to integrate social history and cultural context into music history teaching the shift away from the classical canon and how to organize a course taking into consideration time constraints and the need to appeal to students from a diverse range of backgrounds With contributions from both teachers approaching retirement and those at the start of their careers this volume provides a spectrum of experience which will prove valuable to all teachers of music history

Lucas,Laura Moore Pruett,2024-10-14 Teaching Difficult Topics provides a series of on the ground reflections from college music instructors working in a wide variety of institutional settings about their approaches to inclusive supportive pedagogy in the music classroom Although some imagine the music classroom to be an apolitical space instructors find themselves increasingly in need of resources for incorporating issues of

race and ethnicity gender and sexuality and historical trauma into their classrooms in ways that support student learning and safeguard their classroom communities The teaching reflections in Teaching Difficult Topics examine difficult themes that fall into three primary categories subjects that instructors sense to be controversial or emotionally challenging to discuss those that derive from or intersect with real world events that are difficult to process and bigger picture discussions of how music studies often focuses on dominant narratives while overlooking other perspectives Some chapters offer practical guidance lesson plans and teaching materials to enable instructors to build discussions of race gender sexuality and traumatic histories into their own classrooms others take a more global view reflecting on the importance and relevance of teaching these difficult topics and on how to respond in the music classroom when external events disrupt daily life

Engaging Middle School Students Through Music History Mini-lessons Jessica Bentley Frerich,2022

Understanding history is a vital part of learning Nearly every question asked in a music classroom about musical context involves its history from notation to gestures or technicality to aural listening History can bring music to life for both the performers and listeners Despite multiple studies on specific historical music events music history perspectives have not been addressed in the choral classroom Moreover research forums have yet to explore engagement factors of middle school students through a music history curriculum in the choir classrooms Such research could provide a valid model for educators This mixed methods research study seeks to determine if music history lessons offer a statistically significant difference in student engagement by identifying viewpoints that have not been explored and documented concerning middle school choir students learning values and understanding of music The researcher will illustrate an engagement of middle school choir students with the musical genres of jazz rock pop and classical before and after mini lessons about the historical context Responses were collected through a pre test and post test survey and questionnaire This quasi experiment will utilize a control and variable group of seventh grade choir students N 68 from a middle school in Iowa
