

The background of the image is a dark, textured surface with a subtle, radiating pattern. A single, solid blue circle is positioned in the center. From this central circle, several blue lines of varying lengths radiate outwards, creating a sunburst or fan-like effect. The lines are darker blue than the circle itself, and the overall effect is one of depth and perspective.

## **The Mystery Of The Mind Wilder Penfield:**

*The Mystery of the Mind* Wilder Penfield, 2025-03-25 A classic account of the relationship between the human brain and the human mind. Can the mind be explained by what we know about the brain? Is a person's being determined by their body alone or by their mind and body as separate elements? In this incisive and engaging book, Wilder Penfield, whose work pioneered such research, shares insights into these and other questions, providing an in-depth look at the function of the brain and its relationship to the action of the mind. With a foreword by Charles W. Hendel, an introduction by William Feindel, and reflections by Sir Charles Symonds, *The Mystery of the Mind* is Penfield's compelling personal account of his experiences as a neurosurgeon and scientist observing the inner workings of the brain in conscious patients.

*The Immortal Mind* Michael Egnor, Denyse O'Leary, 2025-06-03 A neuroscientist and surgeon makes an argument for the existence of a spiritual human soul in this eye-opening book. Many scientists and doctors believe that there is no such thing as the soul. That there is no part of us that persists beyond death. We are not spiritual in any respect. We are made up of cells and tissue and completely controlled by a material organ in our heads: the brain. In this groundbreaking book, Dr. Michael Egnor makes the case based on 40 years of practice and over 7,000 brain surgeries that science has gotten it all wrong. The human brain is incredible, mysterious, and powerful. But it's not what makes us who we are. The soul does that. Drawing on the most important research studies in neuroscience, Dr. Egnor presents evidence that the brain alone does not explain the mind. He explores using modern neuroscience and his vast surgical experience how inside every damaged brain there is a thinking, feeling person with a spiritual soul that transcends the brain. He also uses fascinating case studies to show how research on conjoined twins who share parts of their brains or patients in deep coma who are still able to communicate with people around them on near-death experiences and on artificial intelligence all make a scientific case for the existence of the spiritual human soul. Engaging, thought-provoking, and groundbreaking, *The Immortal Mind* shows here that some aspect of who we are is spiritual and immortal, transcending the physical body.
