An expertly written text explains the fundamentals of meteorology to beginners and offers interesting pointers on weather prediction to more experienced weather watchers. It also lists the forecasting equipment that home meteorologists will need, including a barometer/thermometer and a simple device for measuring wind speed and direction. Readers will find explanations of the different cloud types, information on what kinds of weather they indicate, tips on measuring precipitation, instruction on reading a weather map, and advice on predicting thunderstorms and other weather phenomena. A 104-page logbook section, 52 two-page spreads, provides space for charting weather-related data for a full calendar year. *Weather Tracker* is printed in two colors and features more than 60 enlightening illustrations and diagrams. Its rubberized PCV cover with wrap-around flap and a snap to keep it closed will protect the pages against the elements when weather watchers take the book outdoors.
