A Case Study on the Impact of YouTube-Videos on Political Campaigning Anna Poppen, 2014-06-06 Seminar paper from the year 2011 in the subject Didactics for the subject English Applied Geography grade 1.0 Carl von Ossietzky University of Oldenburg language English abstract The video sharing website YouTube has become a phenomenon that is part of an increasing number of people's lives and also a part of the usual presidential rhetoric Before the launch of YouTube in 2005 the enormous effects of this online phenomenon on all aspects of society could hardly be foreseen In 2011 however it is obvious that YouTube and other online media affect every day life including political decision making in many ways The 2004 US presidential election is often referred to as the first internet election as the candidates Howard Dean in particular started to use blogs and websites to raise money and convince voters online Zielmann R ttger 2009 77 By 2008 the internet had become even more diverse and complex and offered a lot of new online functions like social networking sites Facebook and video sharing sites YouTube These new opportunities were used by most of the candidates in the 2008 presidential election The later US President Barack Obama as well as his internal opponent Hillary Clinton made use of the internet to spread their political messages and address especially the younger voters A study that was conducted by the Pew Internet American Life Project during the 2008 election campaign proved that 40% of all adults accessed information about politics on the internet It also showed that viewers of politically relevant YouTube videos had become a key part of at least some campaign events Rainie Smith 2008 In 2008 the online world was not new to most people but it was used as a major propaganda tool by most politicians and their campaign teams for the first time In the Democratic primary elections several candidates did not announce their candidacy in the traditional press but online On July 23 2007 the first ever political debate took place on YouTube **Everyone Breaks These Laws** Gerardo Con Diaz, 2025-06-17 Copyright's profound impact on the online world as we know it This book is a captivating exploration of the profound impact of American copyright law on our online lives By telling stories about hope art greed and fear and how they have affected the legal dimensions of creativity and technological change this book uncovers the hidden forces shaping our digital world Gerardo Con D az examines the strange world of online copyrights from the 1990s to today's AI driven era showing how our ability to immerse ourselves in digital media depends on the erosion of what it means for people to own their creative works online and offline He delves into the often overlooked impact of digital ownership on privacy and self expression in this fascinating field guide to the complex landscape of online rights *Automated Copyright Filters* Oliver Englisch, 2025-05-02 The automated filtering of upload attempts to online platforms is one of the most contentious issues in the fields of copyright enforcement and platform regulation Notwithstanding the impassioned debate research from a law and economics perspective is scarce This book presents the first comprehensive economic analysis of automated copyright

filtering The author develops an economic model of the competition between right holders and copyright infringing uploaders on a platform Furthermore he applies insights from the economic literature on decision making under uncertainty and incentive alignment to automated copyright filtering The analysis disentangles complex relationships and challenges prevailing assumptions It offers a novel perspective on the implications of automated filtering for the objectives of copyright policy on the avoidance of erroneous filtering decisions and on regulatory approaches to automated filtering The author employs his findings to evaluate the current US and EU legal frameworks and proposes improvements This book will appeal to researchers and policy makers interested in automated filtering copyright enforcement and platform regulation
