Due to COVID 19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of SCSM 2021 Part I are organized in topical sections named Computer Mediated Communication Social Network Analysis Experience Design in Social Computing Cybersecurity and Human Rights in the Age of Cybertechnology Joanna Kulesza, Roy Balleste, 2015-12-17 Cybersecurity and Human Rights in the Age of Cybertechnology is a collection of articles by distinguished authors from the US and Europe and presents a contemporary perspective on the limits online of human rights. By considering the latest political events and case law including the NSA PRISM surveillance program controversy the planned EU data protection amendments and the latest European Court of Human Rights jurisprudence it provides an analysis of the ongoing legal discourse on global cybertechnology. Using examples from contemporary state practice including content filtering and Internet shutdowns during the Arab Spring as well as the PRISM controversy the authors identify limits of state and third party interference with individual human rights of Internet users. Analysis is based on existing human rights standards as enshrined within international law including the Universal Declaration of Human Rights International Covenant on Civil and Political Rights European Convention on Human Rights and recommendations from the Human Rights Council. The definition of human rights perceived as freedoms and liberties guaranteed to every human being by international legal consensus will be presented based on the rich body on international law. The book is designed to serve as a reference source for early 21st century information policies and on the future of Internet governance and will be useful to scholars in the information studies fields including computer information and library science.
