In many respects this book represents a considerable departure from traditional works on international relations in the Middle East. Instead of offering partial explanations based on conventional approaches, this book attempts to incorporate studies with different methodological approaches and with the Middle East Foreign Affairs specialists offer balanced and linguistically neutral commentaries while marshalling empirical data to support their analyses. The result is a broad synthesis which helps the reader see the larger picture despite its complexity. The Middle East is considered as a subordinate system of the international political system. In Part 1 the chapters in this section focus on the nations of the area and their interactions within the subsystem. The papers also examine the implications of these interactions to the nations outside the Middle East. In Part 2 the scope of inquiry is enlarged to treat interactions between the major world powers and the nations of the Middle East. Papers in Part 3 focus upon American foreign policy in the Middle East. This portion examines the roles of various special interest groups such as the oil companies, Zionists, the United States Congress, newspapers, and religious bodies as they relate to the formation of American policy for the Middle East. In essence, *The Middle East* is an international relations study of the Middle East. Additionally, it has new material on the treatment of religious influences upon the Middle East, the attitudes of some major newspapers towards the Middle East conflict, and the domestic position of Israel regarding the Arab-Israeli conflict, seldom discussed in other works.

The Quest for Hegemony in the Arab World Poteh, 2022-02-22

The struggle between Egypt and Iraq over Arab hegemony constitutes the main theme of this study. Focussing on the struggle over Middle Eastern defense between 1945-58 and culminating in the conflict over the Baghdad Pact 1955-58, it sheds new light on Arab politics during the period under review. This research concentrates predominantly on the regional actors. The underlying assumption is that policies were not necessarily formulated in Washington and London and that often enough major decisions taken in Ankara, Cairo, Baghdad, Damascus, Amman, and other Arab capitals affected decision makers in Western capitals. *The Quest for Hegemony in the Arab World* is based on newly released British, American, and Israeli documents as well as on all available Arab sources. The study's value rests upon its discussion of the Baghdad Pact, a significant event which was hitherto neglected yet marked a watershed in modern Arab history. This study's approach offers an analytical framework with which the present struggle for hegemony in the Arab world may be examined.

The Arms Race in the Middle East Mohammad Eslami, Alena Vysotskaya Guedes Vieira, 2023-07-28

This edited volume discusses security policy and strategic policymaking in the Middle East region. Due to its unique geopolitical, geoeconomic, and

geostrategic features the Middle East region has been confronted with challenging security issues Combined with a lack of an efficient regional security regime this has led to the formation of a full fledged arms race This book draws together contributions from international experts to address the factors that have been contributing to the ongoing formation of an arms race in the Middle East as well as the impact of this phenomenon on the regional and global security environment The book is organized in three sections The first section outlines the contemporary dynamics of the arms race in the Middle East by focusing on its most recent dynamics and their implications for regional and international security The second section conducts systematic analysis of case studies of country specific drivers of the arms race The third and final section examines the role of external actors in the arms race evaluating both the responses of regional actors to external interventions as well as the implications of the arms race for extra regional countries

The Middle East William Bayne Fisher,1952 Overlapping Regional Orders in the Middle East and North Africa Jordi Quero,2023-11-24 Focused on a set of overlapping international orders of regional scope present in the Middle East and North Africa this book argues that rules and primary institutions have sanctioned the foreign behavior of the sub system s international actors since 1945 The author avoids recent IR trends focused on narrow case studies instead providing a comprehensive overview of the MENA s regional politics The normative content and evolution of multiple international orders are examined constituting the intra Arab order the Arab Israeli order and the Arab Iranian order as well as the expression of the global order in regional interactions Drawing on Area Studies and English School and constructivist IR theories the author argues that a plurality of overlapping regional orders have coexisted since 1945 not just one as is commonly suggested in the literature Each of these orders is integrated by different participants and has developed its own differentiated norms and institutions setting parameters on legitimate behavior This analytical proposal helps make sense of foreign relations otherwise labeled as incoherent The book has wide appeal accessible both to students wishing to learn about the politics history and sociology of the Middle East as well as to specialists seeking original research on the functioning of the MENA s regional orders

Islam and Statecraft Jon Hoffman, 2025-01-23 Instead of religion influencing political outcomes this analysis examines how politics influences religious outcomes Dominant analyses examining the utilization of religion as a tool of statecraft in the Middle East remain overwhelmingly fixated on how Islam influences the foreign policies of different state actors not how political considerations often influence the forms Islam assumes and how religion itself is often molded according to strategic considerations of political elites That Islam due to its unique or exceptional relationship with politics drives political outcomes at the international level in the Middle East is a myth this book shatters by demonstrating how the political considerations of ruling elites specifically the intersection of domestic and foreign threats influence and constrain the kinds of religious soft power strategies adopted by states in the region This book develops a comprehensive analytical framework for the notion of religious soft power capable of incorporating power based identity based and ideational variables to examine how states couple religion with their broader foreign policy conduct This framework is applied to the Middle East through the specific examination of three countries Saudi Arabia Qatar and the United Arab Emirates in the period following the Arab Uprisings to demonstrate how specific religious narratives identities histories and ideologies are constructed by political elites in the Middle East for the advancement of what are inherently political objectives namely the imperatives of regime preservation and power projection *The Middle East, Abstracts and Index* ,1999
