The Mysterious Universe:

The Mysterious Universe Sir James Hopwood Jeans, 1932 *The Mysterious Universe* James Jeans, 1933 *The mysterious universe* James Hopwood Jeans, 1945 *The Mysterious Universe [New Revised Edition]* Sir James Hopwood Jeans, 2017-07-31 The Mysterious Universe is a science book by the British astrophysicist Sir James Jeans. It is an expanded version of the Rede Lecture delivered at the University of Cambridge in 1930 and begins with a full page citation of the famous passage in Plato's Republic Book VII laying out the allegory of the cave. It makes frequent reference to the quantum theory of radiation begun by Max Planck in 1900 to Einstein's general relativity and to the new theories of quantum mechanics of Heisenberg and Schrödinger of whose philosophical perplexities the author seemed well aware. This New Revised Edition was first published in 1932. A popular book to this day and a valuable addition to any reader's science book collection.

The Mysterious Universe James Hopwood Jeans (Sir), 1930 **The Mysterious Universe** James Jeans, 2008 Originating from the Rede Lecture delivered at the University of Cambridge in November 1930, this book is based upon the conviction that the teachings and findings of astronomy and physical science are destined to produce an immense change in our outlook on the universe as a whole and on views about the significance of human life. The author contends that the questions at issue are ultimately one for philosophical discussion but that before philosophers can speak science should present ascertained facts and provisional hypotheses. The book is therefore written with these thoughts in mind while broadly presenting the fundamental physical ideas and findings relevant for a wider philosophical inquiry.

The Mysterious Universe James Jeans, 2009-07 Originates from the Rede Lecture delivered at the University of Cambridge in November 1930. Discusses how the mysteries of the universe are slowly being revealed to us by recent developments in space technology and provides basic information on the origin of our universe and its components.

The Mysterious Universe Nigel Henbest, 1981 **The Mysterious Universe. (Reprinted, with Further Corrections.).** James Jeans, 1930 **The Mysterious Universe** Ellen Jackson, 2008 The universe is rapidly expanding. Of that much scientists are certain. But how fast? And with what implications regarding the fate of the universe? Ellen Jackson and Nic Bishop follow Dr Alex Filippenko and his High Z Supernova Search Team to Mauna Kea volcano in Hawaii where they will study space phenomena and look for supernovae—dying stars that explode with the power of billions of hydrogen bombs. Dr Filippenko looks for black holes—areas in space with such a strong gravitational pull that no matter or energy can escape from them—with his robotic telescope. And they study the effects of dark energy, the mysterious force that scientists believe is pushing the universe apart, causing its constant and accelerating expansion.
