Adam Smith's contribution to economics is well recognised yet scholars have recently been exploring anew the multidisciplinary nature of his works The Adam Smith Review is a rigorously refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of Adam Smith's works his place in history and the significance of his writings to the modern world It is aimed at facilitating debate among scholars working across the humanities and social sciences thus emulating the reach of the Enlightenment world which Smith helped to shape This 13th volume demonstrates perhaps more so than any other issue in recent memory the dazzling breadth and diversity of Smith scholarship across the disciplines today from studies of hospitals balls and monsters to colonies clerisy language and the mind from issues of empathy compassion cohesion translation representation paternalism and moral innovation to Smith's influence on Japanese Portuguese Chinese American and Italian thought and practice Adam Smith remains our companion always provoking us and stimulating creative directions in our thinking and research  
**A History of Economic Thought** Lionel Robbins, 2000-10-16 Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas This volume represents the first time those lectures have been published Lord Robbins 1898-1984 was a remarkably accomplished thinker writer and public figure He made important contributions to economic theory methodology and policy analysis directed the economic section of Winston Churchill's War Cabinet and served as chairman of the Financial Times As a historian of economic ideas he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century These lectures delivered at the London School of Economics between 1979 and 1981 and tape recorded by Robbins's grandson display his mastery of the intellectual history of economics his infectious enthusiasm for the subject and his eloquence and incisive wit They cover a broad chronological range

beginning with Plato Aristotle and Aquinas focusing extensively on Adam Smith Thomas Malthus and the classicals and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall Robbins takes a varied and inclusive approach to intellectual history As he says in his first lecture I shall go my own sweet way sometimes talk about doctrine sometimes talk about persons sometimes talk about periods The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions and social sciences without understanding the ideas behind their development Authoritative yet accessible combining the immediacy of the spoken word with Robbins's exceptional talent for clear well organized exposition this volume will be welcomed by anyone interested in the intellectual origins of the modern world     *An Introduction to Sustainable Development* Jennifer A. Elliott, 2013 The contested nature of sustainable development is explored through a detailed consideration of changing ideas and practices within environmentalism and development thinking     **The Cambridge University Calendar** University of Cambridge, 1911     **State of the World's Cities 2012/2013** UN Habitat, 2013-10-23 The city is the home of prosperity It is the place where human beings find satisfaction of basic needs and access to essential public goods The city is also where ambitions aspirations and other material and immaterial aspects of life are realized providing contentment and happiness It is a locus at which the prospects of prosperity and individual and collective well being can be increased However when prosperity is restricted to some groups when it is used to pursue specific interests or when it is a justification for financial gains for the few to the detriment of the majority the city becomes the arena where the right to shared prosperity is claimed and fought for As people in the latter part of 2011 gathered in Cairo's Tahrir Square in Madrid's Puerta del Sol in front of London's St Paul's cathedral or in New York's Zuccotti Park they were not only demanding more equality and inclusion they were also expressing the need for prosperity to be shared across all segments of society What this new edition of *State of the World's Cities* shows is that prosperity for all has been compromised by a narrow focus on economic growth UN Habitat suggests a fresh approach to prosperity beyond the solely economic emphasis including other vital dimensions such as quality of life adequate infrastructures equity and environmental sustainability The Report proposes a new tool the City Prosperity Index together with a conceptual matrix the Wheel of Prosperity both of which are meant to assist decision makers to design clear policy interventions The Report advocates for the need of cities to enhance the public realm expand public goods and consolidate rights to the commons for all as a way to expand prosperity This comes in response to the observed trend of enclosing or restricting these goods and commons in enclaves of prosperity or depleting them through unsustainable use The Report maps out major policy steps to promote a new type of city the city of the twenty first century that is a good people centred city One that is capable of integrating the tangible and more intangible aspects of prosperity and in the process shedding off the inefficient unsustainable forms and functionalities of the city of the previous century By doing this UN Habitat plays a pivotal role in ensuring that urban planning legal regulatory and institutional frameworks become instruments of prosperity and well
