Access by Design Sarah Horton,2013-04-18 In just over a decade the Web has evolved from an experimental tool for a limited community of technically inclined people into a day to day necessity for millions upon millions of users Today's Web designers must consider not only the content needs of the sites they create but also the wide range of additional needs their users may have for example those with physical or cognitive disabilities those with slow modems or small screens and those with limited education or familiarity with the Web Bestselling author Sarah Horton argues that simply meeting the official standards and guidelines for Web accessibility is not enough Her goal is universal usability and in Access by Design A Guide to Universal Usability for Web Designers Sarah describes a design methodology that addresses accessibility requirements but then goes beyond As a result designers learn how to optimize page designs to work more effectively for more users disabled or not Working through each of the main functional features of Web sites she provides clear principles for using HTML and CSS to deal with elements such as text forms images and tables illustrating each with an example drawn from the real world Through these guidelines Sarah makes a convincing case that good design principles benefit all users of the Web In this book you will find Clear principles for using HTML and CSS to design functional and accessible Web sites Best practices for each of the main elements of Web pages text forms images tables frames links interactivity and page layout Seasoned advice for using style sheets that provide flexibility to both designer and user without compromising usability Illustrations of actual Web sites from which designers can model their own pages Instructions for providing keyboard accessibility flexible layouts and user controlled environments Practical tips on markup and resources

Traditional Vs. Web Style Guides ,1996 This paper describes a study in which Web style guides were characterized compared to traditional human computer interface HCI style guides and evaluated against findings from HCI reviews of web pages and applications Findings showed little consistency among the 21 Web style guides assessed with 75% of recommendations appearing in only one style guide While there was some overlap only 20% of Web relevant recommendations from traditional style guides were found in Web style guides Web style guides emphasized common look and feel information display and navigation issues with little mention of many issues prominent in traditional style guides

such as help message boxes and data entry. This difference is reinforced by other results showing that Web style guides address Web information only pages with much greater success than web based control enabling features like buttons and entry fields. It is concluded that while the WWW represents a unique graphical user interface GUI environment development of Web style guides has been less rigorous with issues associated with web based control enabling features neglected.
