Understanding Human Development 3rd Edition:

Understanding Human Development Louise Harms, 2020-10-28 A multidimensional approach to understanding the complexities of human behaviour and development across the lifespan. Each person is uniquely shaped throughout their life by many significant dimensions. **Understanding Human Development** introduces students to new ways of understanding these many dimensions and how they interact to influence human adaptation and coping across the lifespan. Now in its third edition, this text is significantly revised to provide students with the core theoretical understandings of human development and behaviour. Each chapter introduces students to the ideas and research that will likely inform key debates, controversies and implications for practice. It aims to foster students' thinking and their interest in a broad range of issues that have the potential to profoundly influence human behaviour and development. **NEW TO THIS EDITION** Heavily revised content reflects recent developments in social work and human development. A new three part structure allows for easy navigation of the text. A unique section devoted to trauma and loss. Renewed Practice in Context boxes written by social workers help students to place theory in real world context. Updated Apply your Understanding in each chapter encourages students to critically reflect on the ideas being introduced. New Weblinks and references at the end of each chapter provide useful sources of research and practice and policy materials.

Understanding Human Development Ursula M. Staudinger, Ulman E.R.

Lindenberger, 2012-12-06 K Warner Schaie I am pleased to write a foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague, mentor or research collaborator. The editors begin their introduction by asking why one would want to read yet another book on human development. They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development. This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure. This approach does not surprise. After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students, junior scientists or senior visitors. That institute under the leadership of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality. Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context.
