**Handbook of Rural School Mental Health** Kurt D. Michael, John Paul Jameson, 2017-09-21 This handbook offers a comprehensive overview of school mental health SMH initiatives in rural areas in the United States. It offers clinical and administrative guidelines for innovative and effective programs addressing critical problems among rural youth and in areas where funding and resources are scarce. Chapters cover program development, implementation, sustainability, and evaluation. They consider issues of community and policy support, address barriers to access and delivery, and debunk misconceptions about the region and its cultures. Chapters also discuss rural SMH applications relating to special populations including students with autism, depression, anxiety, bipolar disorder, conduct disorders, and ADHD. In addition, the book examines the potential of school-based programs as a counter to the stigma and distrust of mental health services common to the region. Topics featured in the Handbook include: The value of rural SMH from an educator's standpoint; Preventing suicide among students in rural schools; Substance abuse in rural school settings; Bullying and cyberbully among rural youth; Intergenerational patterns of mental illness in rural settings and their relevance for SMH; The importance of involving communities in culturally competent rural interventions. The Handbook of Rural School Mental Health is a must-have resource for researchers, scientist practitioners, and graduate students in child and school psychology, educational psychology, social work, counseling, educational policymakers, pediatrics, school nursing, teaching, and teacher education.

Lippincott's Monthly Magazine, 1890

Behavioral Approaches to Therapy Robert C. Carson, John W. Thibaut, 1976

The Best of Behaviour Research and Therapy Stanley Rachman, Hans Jürgen Eysenck, 1997-10-09

The first issue of Behaviour Research and Therapy (BRAT) appeared in 1962. This collection of outstanding articles from the journal defining the development of behaviour therapy since the journal's launch has been put together to celebrate thirty five years of publication. The selections cover three main areas Theory, Methods and Treatment. Articles that were topical ten or twenty years ago but have been superseded by new collections of facts were not chosen. Hence the many articles on the treatment of phobias were omitted as were treatment outcome trials that are without historical interest and ideas, methods that failed e.g. aversion therapy. Instead six papers on theory are included: Professor Eysenck's statement of his theory of neurosis, Clark's heavily quoted landmark paper on the cognitive theory of panic, the correspondingly important paper on OCD by Salkovskis, Teasdale on depression, Philips on a cognitive view of pain and a model of emotional processing. From a wide range of papers on method two stand out because of their widespread adoption in modified forms: Freund's plethysmographic method and Velten's mood induction technique. On the treatment side preference has been given to innovative techniques such as Vic Meyer's treatment of OCD, Fordyce on pain control, Azrin on habit reversal, Turk on cancer pain and new approaches to the treatment of bulimia and of bereavement.

Principles of Psychopharmacology for Mental Health Professionals Jeffrey E. Kelsey, D. Jeffrey Newport, Charles B. Nemeroff, 2006

Principles of Psychopharmacology for Mental Health Professionals addresses the current split model of mental health that combines the care of a physician who delivers pharmacotherapy with the care of a mental health professional. This book is intended to familiarize mental health professionals with the drugs used to treat mental illness so they can recognize side effects of treatment and provide better care for their patients.
