Revitalizing the Institution of Marriage for the Twenty-First Century Alan J. Hawkins, Lynn D. Wardle, David Orgon Coolidge, David Coolidge, 2002-01-30 As divorce rates in the United States reach alarming levels the institution of marriage receives more and more criticism as an unrealistic endeavor However the contributors to this volume view marriage as a vital social institution not merely one kind of intimate relationship They argue for stronger support through legal and policy reform in order to strengthen for the benefit of individuals communities and the nation The contributors address hot button issues such as same sex marriage effects of divorce on children and the role of fathers in addition to issues such as the permanence of marriage covenant marriage and the role of religion in marriage This work brings together the work of respected legal scholars and social scientists who articulate why we should care about strengthening the institution of marriage what we can do and what challenges we face Despite dramatic social change marriage remains a critical social institution that promotes individual family and community well being The contributors to this book believe that marriage deserves our best efforts to revitalize it instead of a conscious agenda of benign neglect Here assembled in one place is a clear pro marriage research and policy agenda aimed at revitalizing this insitution based on principles of the best interests of children husbands and wives and society at large Contributors from both the social sciences and legal studies illuminate critical issues from a variety of important perspectives providing a comprehensive and respectful treatment of a timely and often divisive subject

Levine,2002 This paper considers the impact of changes in abortion and welfare policies along with economic conditions over the 1985 to 1996 period at each stage of the fertility decision tree including sexual activity contraception pregnancy abortion and birth Examining the impact of policy at each stage of the decision tree represents a useful approach because consistent findings provide stronger evidence of a causal link than focusing on just one stage The abortion policies considered are parental involvement laws and mandatory waiting periods welfare policies include benefit generosity as well as state level welfare waivers as a whole and the family cap State level data over this period are used to examine abortion birth and pregnancy outcomes while microdata from the 1988 and 1995 National Surveys of Family Growth are employed to examine sexual activity and contraception For those policies that target

certain subgroups of the population estimates are provided separately for each group and compared to help further identify causality I find that parental involvement laws increase contraception use among minors leading to fewer pregnancies and therefore fewer abortions teen births do not rise in response Evidence regarding welfare policies does not consistently support any impact throughout the decision tree *Deliberative Choices* Gary Mucciaroni, Paul J.
