Corporate Finance text by Stephen A Ross Randolph W Westerfield Jeffrey F Jaffe and Bradford D Jordan [Automation and Autonomy](#) James Steinhoff, 2021-06-21 This book argues that Marxist theory is essential for understanding the contemporary industrialization of the form of artificial intelligence AI called machine learning It includes a political economic history of AI tracking how it went from a fringe research interest for a handful of scientists in the 1950s to a centerpiece of cybernetic capital fifty years later It also includes a political economic study of the scale scope and dynamics of the contemporary AI industry as well as a labour process analysis of commercial machine learning software production based on interviews with workers and management in AI companies around the world ranging from tiny startups to giant technology firms On the basis of this study Steinhoff develops a Marxist analysis to argue that the popular theory of immaterial labour which holds that information technologies increase the autonomy of workers from capital tending towards a post capitalist economy does not adequately describe the situation of high tech digital labour today In the AI industry digital labour remains firmly under the control of capital Steinhoff argues that theories discerning therein an emergent autonomy of labour are in fact witnessing labour s increasing automation

**Essays on Longtermism** Hilary Greaves, Jacob Barrett, David Thorstad, 2025-09-02 This is an open access title It is available to read and download as a free PDF version on Oxford Academic and is made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 International licence Longtermism broadly speaking is the view that positively influencing the long-term future is one of the key moral priorities of our time Calls for taking a long-term view towards global problems such as climate change and poverty are familiar typically urging us to plan on a scale of decades or perhaps a century By contrast longtermism asks us to take seriously the idea that what we should do right now may depend on the effects of our actions thousands even millions of years into the future Essays on Longtermism brings together leading scholars to discuss four sets of overlapping questions raised by the longtermist approach First should we accept some version of longtermism Second to what extent can we predict and control the far future Third which ethical priorities are recommended by longtermism and how visionary are they Finally what implications would longtermism have for the design or reform of social, political, and legal institutions Contributors who include both supporters and critics of longtermism are drawn from a range of disciplines including philosophy, economics, psychology, law, political science, and

mathematics and from private industry     **Ethics of Virtual Reality** Michael J. Grabowski,2024-12-15 In this book Michael Grabowski draws on established theories of ethics to consider critical questions surrounding the growing adoption of virtual reality VR technologies These questions include who should control and have access to VR its impact on privacy its potential for misrepresentation and bias and how to provide a platform for free expression while mitigating harassment and abuse Grabowski examines use cases of other digital technologies including social media and artificial intelligence to examine who is helped and harmed by the widespread implementation of VR and how it might transform existing institutions social relationships and communication Finally Grabowski forecasts the possible futures of VR and what limits if any should be placed on representing the real world or imagining new ones Scholars of media studies technology studies communication and ethics will find this book of particular interest

**Leadership 2.0 in processes of a sustainable change** Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
