V.

Chalapati Rao, 2008 Environmental pollution has assumed alarming proportions in recent years. Its adverse impact on the everyday lives of people is increasing in magnitude and intensity. That more and more people are becoming aware of this hazard is evident from the fact that National Environmental Engineering Research Institute is inundated with queries relating to various aspects of environmental pollution. This book has been prepared to present the environmental status of India, study various pertinent issues and suggest measures to mitigate the harmful effects of environmental pollution. It is divided into seven main sections each dealing with an important aspect of environmental pollution. The Air Pollution section describes the different sources and types of air pollution, the status of air quality, the concerns and inadequacy in management and control and their related health impacts. The section on Water studies water resources, their distribution across India and the major contaminants that pollute water. One section of the book exclusively deals with the problem of wastewater generated by industries and municipal sewage. The section on Solid Waste and Hazardous Waste categorises the types of waste generated and suggests different treatment options thereof. The challenges of disposal of hazardous wastes have also been discussed. Pollution related problems in soil and land use have been analysed in Land Environment section. The book analyses all the important aspects of environmental pollution and suggests measures to keep it under control. It will be useful to students, teachers, researchers, policymakers and common readers.

Global Environment Klaus Bosselmann & Prasenjit Maiti, 2007 Legal Regime of Marine Environment in the Bay of Bengal M. Habibur Rahman, 2007 There Is A Growing Concern About The Change In Composition Of The Atmosphere, Depletion Of The Ozone Shield, Pollution Of Marines And Rapid Population Growth Leading To Alarming Imbalance Between Population And Resources. Concerted Efforts Are Being Made Across The World To Curb The Environmental Degradation. The UN Conference On The Human Environment Held In Stockholm In 1972 Marked The Beginning Of The Development Of International Environmental Law By Soft Law Mechanism. With The UN Convention On The Law Of The Sea 1982 The State Parties Have Been Made Obligatory To Protect The Marine Environment Including All The Resources Therein. The Present Book Is A Treatise On The Legal Regime Of The Marine Environment In The Bay Of Bengal. It Provides A Comprehensive Description And Assessment Of The Legal Regime Governing This Particular Maritime Area. It Focuses On Its Protection, Preservation And Development. It Deals With Fisheries As Well As The Protection Of The Environment Against Pollution And The Discharge Of Waste From Land. Beginning With The Study Of Fisheries Management In The Bay Of Bengal, The Book Includes In Its Study The Major Agreements And Protocols International Documents On Marine Environment, Seabed Mining And Its Consequences, Settlement Of Environmental Disputes And The Present Day Socio Economic Condition In The Bay Of Bengal Region. The Book Also Provides A Bibliography To Enable The Readers To Pursue Their Study Further. The Index That Completes The Book Would Prove A Useful Study Aid To All Readers. Since The Study Is Embedded In The Global Perspective Of The Protection Of The Marine Environment It Shall Be Of Significant Use To All Those In Coastal And Naval Services, Government Executives, Planners And

Policy Makers Concerned With The Protection Of The Marine Environment For The Scholars And Teachers Of International Law It Is An Ideal Reference Book **An Introduction to Sustainable Development** Jennifer Elliott,2006 Annotation Sustainable development continues to be the key idea around which environment and development are structured This extensively revised third edition continues to provide a concise accessible introduction to the ideas behind and the practices flowing from the notion of sustainable development with a particular focus on the developing world The new edition has been extensively updated to highlight recent developments in both theory and practice In particular the theoretical framework underpinning the book has been strengthened and recent activity regarding the developing indicators of sustainable development is comprehensively reviewed Specific attention is now given to the significance of geography and place Containing a wealth of new case studies from across the globe discussion questions guides for further reading and a detailed glossary this text provides an invaluable introduction to the characteristics challenges and opportunities of sustainable development [Education for Environmental Sustainability](#) Elizabeth Rushton,2025-09-18 Drawing extensively on contemporary research and empirical evidence including that from the UK Europe Australia and Brazil this book sets out the key ideas concepts and approaches for education for environmental sustainability in the context of teacher education Conceptual ideas explored in the book include sustainability nature and justice as well as empirically grounded approaches for teacher educators including participation co creation and outdoor education This book provides a research informed guide to enable teacher educators to further explore reflect and implement education for environmental sustainability in their teaching and research so that teacher education is rooted in the endeavour to live justly on a finite planet [Green Development](#) Bill Adams,2008-07-30 The concept of sustainability lies at the core of the challenge of environment and development and the way governments business and environmental groups respond to it Green Development provides a clear and coherent analysis of sustainable development in both theory and practice This third edition retains the clear and powerful argument of previous editions but has been updated to reflect advances in ideas and changes in international policy Greater attention has been given to political ecology environmental risk and the environmental impacts of development This fully revised third edition discusses the origins of thinking about sustainability and sustainable development and its evolution to the present day the ideas that dominate mainstream sustainable development ecological modernization market environmentalism and environmental economics the nature and diversity of alternative ideas about sustainability that challenge business as usual thinking for example ecosocialism ecofeminism deep ecology and political ecology the dilemmas of sustainability in the context of dryland degradation deforestation biodiversity conservation dam construction and urban and industrial development the nature of policy choices about the environment and development strategies and between reformist and radical responses to the contemporary global dilemmas Green Development offers clear insights into the challenges of environmental sustainability and social and economic development It is unique in offering a synthesis of
