## We The People Of Europe Reflections Reflections On Transnational Citizenship:

**We, the People of Europe?** Étienne Balibar, 2009-01-10 tienne Balibar has been one of Europe's most important philosophical and political thinkers since the 1960s. His work has been vastly influential on both sides of the Atlantic throughout the humanities and the social sciences. In *We the People of Europe* he expands on themes raised in his previous works to offer a trenchant and eloquently written analysis of transnational citizenship from the perspective of contemporary Europe. Balibar moves deftly from state theory, national sovereignty and debates on multiculturalism and European racism toward imagining a more democratic and less state-centered European citizenship. Although European unification has progressively divorced the concepts of citizenship and nationhood, this process has met with formidable obstacles. While Balibar seeks a deep understanding of this critical conjuncture, he goes beyond theoretical issues. For example, he examines the emergence alongside the formal aspects of European citizenship of a European apartheid or the reduplication of external borders in the form of internal borders nurtured by dubious notions of national and racial identity. He argues for the democratization of how immigrants and minorities in general are treated by the modern democratic state and the need to reinvent what it means to be a citizen in an increasingly multicultural, diversified world. A major new work by a renowned theorist, *We the People of Europe* offers a far-reaching alternative to the usual framing of multicultural debates in the United States while also engaging with these debates.

**We, the People of Europe?** , 2008 tienne Balibar has been one of Europe's most important philosophical and political thinkers since the 1960s. His work has been vastly influential on both sides of the Atlantic throughout the humanities and the social sciences. In *We the People of Europe*    *Eastern Europe Unmapped* Irene Kacandes, Yuliya Komska, 2017-10-01 Arguably more than any other region, the area known as Eastern Europe has been defined by its location on the map. Yet its inhabitants, from statesmen to literati and from cultural economic elites to the poorest emigrants, have consistently forged or fathomed links to distant lands, populations and intellectual traditions. Through a series of inventive cultural and historical explorations, *Eastern Europe Unmapped* dispenses with scholars' long-time preoccupation with national and regional borders instead raising provocative questions about the area's non-contiguous and frequently global or extraterritorial entanglements.    Reexamining the National-Philological Legacy Vladimir Biti, 2014-01-02 Has thinking, working and teaching in terms of national literatures become obsolete in today's globalized world of hyphenated languages, literatures and cultures? Since the rise of modern European national philologies coincided with the emergence of modern European nation states, does the dissolution of the latter in the European supranational unity imply the suspension of the former? Or we must on the contrary consider the fact that today's Europe is not only post-national but in its re-nationalized East Central European part post-national as well? i.e. emerging out of the breakdown of the post-imperial state formations such as the Soviet Union, Czechoslovakia and Yugoslavia.    The Borders of "Europe" Nicholas De Genova, 2017-08-26 In recent years, the borders of Europe have been perceived as being besieged by a staggering refugee

and migration crisis The contributors to The Borders of Europe see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement Addressing the new technologies and technical forms European states use to curb control and constrain what contributors to the volume call the autonomy of migration this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very idea of Europe They also outline how from Istanbul to London Sweden to Mali and Tunisia to Latvia migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility Contributors Ruben Andersson Nicholas De Genova Dace Dzenovska Evelina Gambino Glenda Garelli Charles Heller Clara Lecadet Souad Osseiran Lorenzo Pezzani Fiorenza Picozza Stephan Scheel Maurice Stierl Laia Soto Bermant Martina Tazzioli *The Wiley Blackwell Companion to Cultural and Social Geography* Ishan Ashutosh, Jamie Winders, 2025-04-28 Addresses both social and cultural geography in a single volume authored and edited by leading authorities in the fields The Companion to Social and Cultural Geography provides reliable and up to date coverage of both foundational topics and emerging themes within two vibrant and increasingly interconnected subdisciplines of geography Building upon the Companion to Cultural Geography first published in 2013 editors Ishan Ashutosh and Jamie Winders offer an expertly curated collection of original essays with special emphasis on early career scholars geographers of color and geographers from the Global South Organized thematically the Companion opens with a series of Global Dispatches from cultural and social geographers working in different disciplines and locations followed by explorations of key concepts in social and cultural geography such as identity belonging solidarity inequalities and intersectional geographies Subsequent chapters examine a wide range of cultural and social geographies including creativity technologies science nature memory tourism migration labor and religion Throughout the Companion authors share fresh insights into the racial reckonings of late ongoing issues related to climate change the consequences of COVID 19 and more Across its 46 chapters the Companion to Social and Cultural Geography Examines how approaches to human environment dynamics in social and cultural geography help shed light on current challenges Covers critical topics such as justice protest borders public health urban planning indigeneity genders class race and sexualities Emphasizes the value of a geographic perspective to understanding social and cultural dynamics Discusses how geography has confronted its deep connections to colonialism imperialism and white supremacy Addresses a range of emerging and established themes including queer and transgender geographies Black geographies animal geographies and cultural geographies of states Incorporates a diversity of writing styles narratives and analyses such as interviews conversations short essays autobiography and autoethnography Accessible authoritative and highly relevant to today's students the Companion to Social and Cultural Geography is an essential textbook for

undergraduate or graduate courses on social or cultural geography cultural studies cultural sociology and ethnic studies

**Model collapse** Lindsay Caplan,Kerry Greaves,2025-12-02 A ground breaking exploration of how art responds to democratic crisis Is democracy over Did we ever really have it Most people would agree that today democracy finds itself in crisis As this crisis has intensified art has emerged as an important means of experimenting with new democratic processes and possibilities In Model collapse an incisive group of art historians and theorists investigate the relationship between art and democracy since the 1990s Exploring a wide range of artistic responses from interactive public sculptures to autonomous curatorial projects critical engagement with electoral politics and creative street protest they offer fresh insights into the limits of representation the appeal of collaboration and the role of the nation state in post national frameworks Model collapse is what happens when large language models start learning from their own generated data and lose all connection to reality This book examines the multiple intersecting crises that shape the conditions for artistic practice and define its socio political aims It advances our understanding of how art can contribute to one of the most vital political issues of our time **The Management of Hate** Nitzan Shoshan,2016-08-09 8 INOCULATING THE NATIONAL PUBLIC A Civilizing Mission Building Coalitions Whose Demonstration Crafting Resilience 9 NATIONAL VISIONS Stars over Berlin Reading the Stars Heterotopic Landscapes Tactics of Visibility Just Mourning Catastrophe at the Gate Afterword Bibliography Index
