**Web Accessibility** Richard Rutter, Patrick H. Lauke, Cynthia Waddell, Jim Thatcher, Shawn Lawton Henry, Bruce Lawson, Andrew Kirkpatrick, Christian Heilmann, Michael R. Burks, Bob Regan, Mark Urban, 2007-03-19 The power of the Web lies in the fact that anyone and everyone can access it and this should also extend to users with disabilities. Accessibility is about making websites accessible to those with aural, visual or physical disabilities or rather constructing websites that don't exclude these people from accessing the content or services provided. This isn't difficult to accomplish and doesn't require anything more than your normal tool set: HTML, CSS, JavaScript, Flash or whatever else. All you need to do is use these tools in the right way and bear in mind the guidelines that exist to help you keep your websites accessible and the laws that enforce web accessibility around the world. This book gives you all you need to know about web accessibility whether you are a web designer or developer who wants your sites to be accessible or a business manager who wants to learn the impact of web accessibility laws on your websites. After an overview of the accessibility law and guidelines and a discussion about accessibility and its implementation in the enterprise, the book goes on to show how to implement accessible websites using a combination of concise references and easy to follow examples covering Understanding assistive technologies, Creating accessible content using XHTML, JavaScript, CSS, Flash and PDFs, Testing against WCAG including 2.0 and Section 508, Retrofitting inaccessible sites where necessary. The book concludes with an in-depth analysis of accessibility law around the world. If you're concerned about the legal and moral implications of web accessibility then this book is perfect for you. It is written by some of the world's experts on accessibility, leaving you in good hands.

That's 16 percent of the world's population or one in six of us. At the same time, over 96 percent of the one million most popular websites have an accessibility issue. There's also a new chapter on Outsourcing Accessibility, exploring third-party bolt-on tools, building your own website platforms like Wix, and popular design systems. You'll explore whether they're helpful or detrimental in the fight to make the web more accessible. Throughout this book, you'll learn to test for, spot, and fix web accessibility issues for a wide range of physical and mental impairments. Featuring content from the latest compliance frameworks, including the newly released WCAG 2.2 and exploratory concepts in WCAG 3, you'll see how to go beyond the basic requirements in order to help your users. You'll also learn that an accessible approach won't just help people with disabilities; it will improve your

website for everyone. This book comes complete with practical examples you can use in your own sites along with a brand new approach to auditing and improving a website's accessibility and a team's approach to it based on tools created by the author and refined over years as a consultant.
